

PRICE LIST

OF

TREES AND PLANTS,

SPRING OF 1878.

C. M. SILVA & SON.

Newcastle, Placer Co., Cal.

Parties desiring larger quantities than quoted in this list will be given prices on application.

TERMS-Cash, or satisfactory reference.

SPECIALTIES-Berries and new fruits of all kinds.

Correspondents will give plain and full directions as to how and by what route they wish Trees shipped.

Persons without experience in California will do well to leave the selection of varieties to us. Having for several years past been engaged in the fruit shipping business, and also the growing of fruits for market, we think we are competent to select.

We do not *recommend* any variety not tested to our satisfaction, neither do we aim to grow a long list of varieties, many of which are worthless, but confine ourselves to the BEST, testing the new sorts as offered, and adding them to our collection if they prove superior. Trees will be well packed, and each variety plainly labeled. We make a small charge for packing.

We will rectify any mistakes on our part if claim is made promptly,

1010.

STRAWBERRIES.

PER 1000. PER 10 PER 100. PER DOZ. MONARCH OF THE WEST \$0 50 \$1 50 \$10 00 \$8 In our estimation, the best variety in cultivation. Fruit of the la size, averaging larger than any variety we have yet tested; fine fla vine a strong grower, and productive. It stood the extremely dry PER Non of '76-7 better than any other variety in our collection. We sub-nit a few of numerous testimonials: The Editor of the California Far-6mer, San Francisco, says:

"MAGNIFICENT STRAWBERRIES.— When we last visited Sacramento, swhile stopping at the fruit warehouse of M. T. Brewer & Co., the firm received from C. M. Silva & Son, of Newcastle, several boxes of the nost splendid strawberries we have yet seen on this Coast, and we can ay they were rarely ever equaled, and never excelled. The "Monarch of the West" is the name of the variety, and when we say the berries neasured from 5 to 61/2 inches in circumference, we can surely boast hat they are not only the "Monarch of the West," but that Silva & Son are entitled to the honor of growing the finest and largest straw-berries ever produced on this Coast."

PER 10 From the San Francisco Market Review:

¹⁰ "A shipment of "Monarch of the West" strawberries from C. M. ⁸⁰ Silva & Son, of Newcastle, were the largest strawberries ever seen in this market, and attracted much attention."

- From Foothill Tidings, Grass Valley. "SUCH BERRIES!—Silva & Son sent us a box of "Monarch of the \$10 West" strawberries this week, which for size and flavor, beat anything we have ever seen. Only think of one berry large enough for two bites. Those before us are of this kind.
 - 10 From the Placer Herdld:

rs.

"The thanks of "Yours Truly" are due to C. M. Silva & Son for a case of the finest strawberries we ever saw. They were of the famous variety known as the "Monarch of the West."

From the Placer Argus:

PER 10 "Some of the largest and finest strawberries to be found anywhere, \$15 are grown on this place - the "Monarch of the West," of which Silva 25 & Son have a large number of vines.'

From John Rock, nurseryman, San Jose: "Box of "Monarch of the West" received, and astounded all the growers who saw them"

From Howe & Hall, Can Francisco:

"Your testimonial of strawberries, the "Monarch of the West," are PER lithe finest we ever saw.

15 From Johnson & Sugden, Agents Fruit Growers' Association, Florin, 30 California:

"Strawberries received, and are unusually fine."

Silva's Koning Claudie-Price \$2.00 Each.

The earliest and best early Blue Plum. A richly colored blue plum of fine flavor, about the size of Royal Hative, and from four to six weeks earlier. Ripened last season May 25th. This plum was imweeks earlier. Ripened last season May 25th. This plum was imported from Germany about the year 1854, by the late Dr. L. E. Miller, of the Sollah Vineyard, in this county, but not disseminated until last year, when it was sent out by us. Messrs. Howe & Hall, Commission Merchants, San Francisco, say: "Plums received, and sold at twenty PER (20) cents per pound. None so early known here. We think you have a good thing." Messrs. M. T. Brewer & Co., Commission Fruit Merchants, Sacramento, write: "Sold the Koning Claudie Plums at thirty (30) cents per pound. They were much admired by fruit growers, and we have already received inquiries for trees."

BRADSHAW, a fine large purple Plum, very popular here, desirable for

shipping.

POND'S SEEDLING, or Hungarian Prune, a beautiful plum of largest PERI size.

^{\$2}WASHINGTON, a large white Plum of first quality, fine for drying or shipping.

PETITE PRUNE DE AGEN, the dried product equal to the Prune of Commerce.

GERMAN PRUNE, fine for all purposes, fruit hangs for a long time after ripening.

PRICE LIST

OF

TREES AND PLANTS,

GROWN AND FOR SALE BY

C. M. SILVA & SON,

Newcastle, Placer County, Cal.

1878-79.

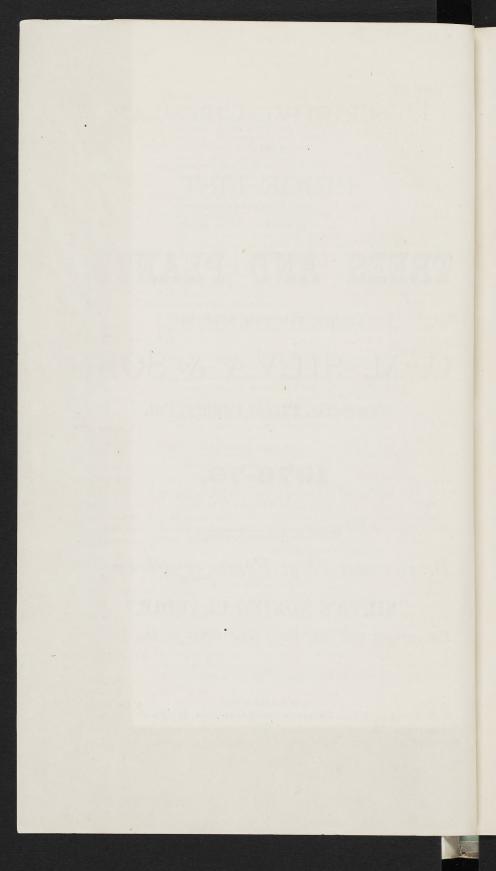

SPECIALTIES:

Berries and New Fruits of all kinds.

"SILVA'S KONING CLAUDIE,"

The earliest and best Early Blue Plum in the World.

SACRAMENTO: H. S. CROCKER & Co., PRINTERS AND STATIONERS, 42 AND 44 J STREET. 1878.

GENERAL REMARKS.

We return many thanks to our numerous friends and patrons for the favors bestowed upon us in seasons past, and hope to be favored with a continuation of their patronage.

We look for a largely increased trade the coming season, and shall strive in the future, as we have in the past, to merit the confidence of our patrons.

The season just past has not been an entirely successful one. In many localities there have been only partial crops of Strawberries, and prices have been low. The failure of crops is principally due to a loss of vigor in the old standard varieties, and the low prices are attributable to the inferior quality of many of the berries sent to market. Improved varieties, such as "Monarch of the West," met with ready sale at remunerative and even high prices. This and other varieties combining large size, flavor, and beauty, together with vigor of plant, are rapidly superseding the old varieties. Raspberries and Blackberries have been very abundant, and prices low.

In this vicinity the earliest varieties of Peaches were almost a total failure. Midsummer and late varieties were plentiful, of fine quality, and met with ready sale at good prices. Late Peaches in some of the valley counties were a failure. Plums and Prunes have been plentiful, and of good quality.

The Apple and Pear crops have suffered greatly from the ravages of the "Coddling Moth," and our growers must use every possible means to circumvent this scourge. Among many of the remedies are the following, recommended in "Downing's Fruits and Fruit Trees of America:"

Small bonfires lighted through the orchard, in the evening, destroy myriads of this and other moths before they have time to deposit their eggs. A simple preventive remedy, or method of trapping the insect when in the grub form, consists in twisting a band or rope of hay, long enough to pass three or four times around the body of the tree, and putting it thereon, securing its ends so as to prevent its becoming loose. They should be examined every two weeks, or oftener, and the grubs destroyed. All fallen fruit should be removed from the orchard as soon as possible, and disposed of in such a manner as to destroy the grubs therein.

There is much information to be obtained from horticultural works and periodicals. Among many others of value are "Downing's Fruits and Fruit Trees of America," "Barry's Fruit Garden," "Elliott's Handbook for Fruit Growers," "Roe's Manual on the Culture of Small Fruits." The "American Agriculturist," the "Gardener's Monthly," "Rural New Yorker," "Fruit Recorder," and "Pacific Rural Press," are excellent publications.

4 C. M. SILVA & SON'S PRICE LIST-1878-9.

During the season past we have fruited many new varieties of fruits. Some of them have proved valuable acquisitions, and will be mentioned in their proper places. A larger proportion have proved unworthy, and will be discarded. We would not advise planting largely of any new untried variety, but would advise growers to procure a few plants or trees of the new varieties, and carefully test them. Experience is worth more to the grower than a volume of the highly colored descriptions of the originator. It costs no more to grow and send to market a choice variety, bringing ten or twelve cents per pound, than it does to grow and market an inferior variety bringing two or four cents. Persons without experience in the business in California will do well to leave the selection of varieties to us. We have been for many years engaged in the fruit shipping business, besides growing fruits for market, and feel competent to select. We offer for sale many new varieties of fruits and berries, before testing them, but we recommend none but those we have tested to our satisfaction. The descriptions of the new untested varieties are those of the originator, or of Eastern nurserymen. We do not aim to grow a long list of varieties, many of which are worthless, but confine ourselves to the best.

Our trees and plants are as fine as can be grown anywhere, and we pack carefully, and label each variety plainly. We will rectify any mistakes on our part if we are advised promptly. Small packages can be sent by mail if desired.

Our terms are cash. Where satisfactory reference is given us, thirty days credit will be given. Remittances may be made by check, express packages, registered letter, or money orders on Auburn, California.

Correspondents will give plain and full directions as to how and by what route they wish trees shipped.

PRICE LIST.

Parties wishing larger quantities than quoted in this list, will be given prices on application.

DIOSPYROS KAKI, OR JAPAN PERSIMMON.

We have not yet tested this fruit. We quote from Henry Loomis' circular, as follows: "The Diospyros Kaki grows in the same varieties of climate and soil as the wild American Persimmon. It is found in the greater part of Japan in abundance, and also in China, from Canton to Pekin. Large orchards are to be seen in the vicinity of Pekin, which has a climate similar to New York. One of the trees has borne fruit in the open air at New York City. The fruit has been grown to perfection at Santa Barbara, Fairoaks, Sonoma, Coloma, Sacramento, Oakland, and Napa. The tree itself is one of the handsomest of fruit trees, and grows to a height of forty to fifty feet, and is said to live one hundred years. They are very hardy and prolific, and a failure of the crop in Japan is unknown. The grafted trees produce in about four years from the graft. As to the fruit itself, it is nutritious and palatable. They may be dried or cured with ease, in which form they are sold as sweetmeats in Japaneseshops. Some are solid, like the apple; others soft and pulpy, and are eaten with a spoon. It does not require frost to bring it to perfection."

Description of Varieties.

Among. Large, round, a little flattened; orange color.

Daimio. Slightly oblong, reddish color, with dark point, medium size, flesh soft. Called "Yeddo's best fruit."

Die Die Mawru. Large, round, with slight point at apex.

Haychuya. Large, oblong, rich color; one of the best.

Hyakame. The largest variety known, and of the very best quality.

Imperial. Very large, with dark stripes on the surface. Flesh soft when ripe, and particularly sweet and fine; when peeled and dried it resembles figs in appearance, being covered with sugar that exudes from the fruit.

Minokaki, sometimes called in Japan, Seedless. Very large, oblong, pointed, high colored; often found nearly or quite without seeds.

Houghton	\$1	50 pe	er doz.,	\$10 per hundred.
Downing				\$3 per doz.

BLACKBERRIES.

PRICE LIST-1878-9.

RASPBERRIES.

Red Antwerp 50 cts per doz., \$2 50 per hundred, \$20 per thousand.

The leading market sort here. Berries large and of good flavor, productive. Our stock is pure, and plants fine. We can buy and furnish mixed plants of this variety (should any one want them) at much lower rates than we can offer the pure plants.

Besides the foregoing, we are testing: Thwack, Delaware,

Reliance, Henrietta, Norwalk Seedling, and others. Pride of the Hudson, Early Prolific,

STRAWBERRIES.

The whole system for the successful cultivation of the Strawberry may be comprehended in a few words. Manure heavily, cultivate thoroughly, irrigate frequently, keep free from weeds, and remove all runners.

In planting, shorten the roots by cutting off about one half, and spread the roots well out. Shortening them facilitates planting, and also causes them to start to grow quicker. A manual on the culture of small fruits, by E. P. Roe, tells how to plant, grow, and market all kinds of small fruits, and is the best work we have seen on this subject. We will send it postpaid for fifty cents.

STRAWBERRIES—(Continued.)

Our plants are as fine as can be obtained anywhere. They are healthy, large, and stocky, and we pack them so they will reach their destination in the best condition.

Description of Varieties.

Fruit of the very largest size, averaging larger than any other variety we have yet tested, fine flavored, vine a strong grower, and productive. It stood the extremely dry season of 1876–7 better than any other variety in our collection. It thrives in almost any kind of soil. This variety is being planted more extensively than any other for the San Francisco market, where it brings the highest prices. We submit a few of numerous testimonials:

• The editor of the *California Farmer* says: "While stopping at the fruit warehouse of M. T. Brewer & Co., the firm received from C. M. Silva & Son, of Newcastle, several boxes of the most splendid Strawberries we have yet seen on this coast. The Monarch of the West is the name of the variety, and they measured from 5 to $6\frac{1}{2}$ inches in circumference."

From the San Francisco Market Review: "A shipment of Monarch of the West Strawberries from C. M. Silva & Son, of Newcastle, were the largest Strawberries ever seen in this market, and attracted much attention,"

From John Rock, Nurseryman, San Jose: "Box of Monarch of the West received, and astounded all the growers who saw them."

From Howe & Hall, San Francisco: "Your testimonial of Strawberries, the Monarch of the West, are the finest we ever saw."

From the *Territorial Enterprise*, Virginia, Nevada: "We received, in splendid condition, a case of monster Strawberries from Ed. B. Silva, Newcastle, California. The berries are of the variety known as Monarch of the West, Each berry is a monarch in itself."

President Wilder........... 50c. per doz. \$1 50 per 100. \$10 per 1,000. We append the description of E. P. Roe: "Exceedingly large, quite prolific, and one of the very latest. It is the handsomest berry I have, and in color, shape, and flavor, cannot be surpassed." We regard the above description as an excellent one.

Chas. Downing...... 50c. per doz. \$1 50 per 100. \$10 per 1,000. Berries large, very abundant, and of good flavor, a constant bearer, fine for home use, but too soft for market.

Wilson's Albany....... 50c. per doz. \$1 50 per 100. \$7 50 per 1,000. An exceedingly productive variety, of good size when well grown, quite firm. color good, quality inferior. We regard it as a valuable market sort, succeeding in nearly all localities.

STRAWBERRIES--(Continued.)

Kentucky....... 50c. per doz. \$1 50 per 100. \$10 per 1,000. Very productive, late, medium size.

DESCRIPTIVE CIRCULAR

AND

· PRICE IISH

TREES AND PLANTS,

OF

GROWN AND FOR SALE BY

C. M. SILVA & SON,

Newcastle, Placer Co., California.

1879-80.

TERMS—Cash to accompany orders.

Remittances may be made by Check on San Francisco or Sacramento; Postal Money Order on *Newcastle*, *Cal.*, or by registered letter.

All Stock plainly labeled and carefully packed. Small packages sent by mail when so ordered.

Please be careful to give plain and full directions as to how and what route you wish goods shipped. Any mistake in filling any order, will be rectified if we are advised promptly.

The prices quoted herein, are for the quantities specified, but half dozen, fifty, and five hundred will be supplied at *dozen*, *hundred* and *thousand* rates respectively.

Remarks.

The season just past has on the whole proved a profitable one to the fru grower. With the exception of the apple and pear crops, which were shortene by the ravages of the codling moth, crops of all kinds of fruit were large, an were sold at remunerative prices, the demand for all kinds of choice fruit bein unusually great. There is too much fruit of inferior quality grown. It cost no more to grow and market fruit of choice quality, than it does the inferior sorts, and a good article always meets with ready sale at good prices.

Great care should be exercised in the selection of varieties. Hundreds of nervarieties are being brought forward each year. These are thoroughly advertise by the parties interested, and merits claimed for them which they do not possess. The glowing descriptions are liable to mislead the planters. It is a good idea to *touch them lightly* until they are tested.

We endeavor to test all new varieties and *recommend none* but what we know to be desirable.

PRICE LIST.

Parties wishing larger quantities than quoted in this list, will be given prices on application.

Souvenir du Congres, 1 00, \$10 pr doz.

A recent introduction, described as larger than "Bartlett," to which it bears astrong resemblance. The skin is smooth, bright yellow when the fruit is fully matured, with the parts exposed to the sun brilliant red or carmine. The flesh, while it is very like that of the Bartlett, is free from its strong musky aroma, and it is firm to the core. It commences to ripen about the 1st of August, before Bartlett, and extends into September. Not yet fruited by us.

PEACHES.

Our selections include the very best varieties from the earliest to the latest.

The latest and best late peach. Fruit large, measuring 8 to 10 inches in circumference; ripens 10th to 25th of October, or nearly one month later than Salway. Freestone, white fleshed, with a beautiful blush cheek. An excellent shipper.

C. M. SILVA & SON'S

RASPBERRIES—(Continued.)

Mr. J. T. Lovett says of this variety: "I regard it as the most valuable raspberry I have yet seen, and I am acquainted with nearly every variety, new and old, that has yet been offered the public, for any and all purposes. The canes, in addition to being hardy, are of tall vigorous growth and enormously productive. Berries very large, measuring three inches around (an occasional one being found that will measure $3\frac{1}{4}$ inches), conical, rich crimson, very handsome, and so firm it can be shipped hundreds of miles by rail in good condition. The flavor is simply remarkable, being rich, sweet and luscious, best—the only firm raspberry I have yet seen that was not decidedly inferior in this respect. It commences to ripen moderately early, and holds out until all others are gone."

Henrietta	\$4 00 per 100.	
Herstine75 cts per doz.	2 00 per 100.	\$15 00 per 1,000
Highland Hardy 50 cts per doz.	2 00 per 100.	15 00 per 1,000

A very hardy variety; very early, an abundant bearer, ripening up its full erop rapidly; very firm, size small to medium.

 Philadelphia
 75 cts per doz.
 \$3 00 per hundred.

 Pride of the Hudson
 \$2 00 per doz.
 10 00 per hundred.

 The finest flavored of all raspberries.
 Berries of the very largest size, productive.
 The best for home use.

Thus described by the introducers: "Fruit large to very large, roundish, regular, color dark red and flesh firm, with a rich sprightly raspberry flavor, entirely free from the flat, insipid, sweet characteristic of so many varieties; will remain in good order three or four days on the bushes after they are ripe; can be safely shipped to distant markets."

Doolittle, Mammoth Cluster, are Blackcaps...\$1 00 per doz. \$3 00 per hundred. Seneca,

STRAWBERRIES.

The whole system for the successful cultivation of the strawberry may be comprehended in a few words: Manure heavily, cultivate thoroughly, irrigate frequently, keep free from weeds and keep off runners. In planting, shorten the roots by cutting off about one-half, and spread roots well out; shortening them facilitates planting, and elso causes them to start to grow quicker.

"A Manual on the Culture of Small Fruits," by E. P. Roe, tells how to plant; grow and market all kinds of small fruits, and is the best work we have seen on the subject; we will send it postpaid, for fifty cents.

We have dropped from our list several varieties which we think are superseded by better sorts. Our Plants are healthy, large and stocky, and we pack them so they will reach their destination in the best condition.

Monarch of the West...Per doz. 50 ets. Per 100, \$1 50. Per 1,000, \$6 00. Fruit of the very largest size, finely flavored; vine a strong grower and productive; brings the highest prices in the San Francisco market.

A late and abundant bearer of very good sized berries.

New Varieties.

This variety may be regarded among Strawberries as the far-famed "Marechal Niel" is among roses-a mammoth variety in every respect. Added to this, it possesses all the qualities that constitute a perfect berry, in the same marked degree as does that remarkable flower toward becoming the ideal rose. Plant and leaf monstrous, deep green, vigorous, hardy and prolific; fruit stalk long and very strong; berries immense, generally oblong, narrowing to the apex, but irregular, quite often flattened, clear bright red, smooth and glossy, firm, sweet, with a delicate aroma. Sharpless has now been fruited in many places for two years, and in all instances has sustained, to an unusual degree, the high praise bestowed upon it by its introducers. On my own grounds, where it has now fruited two seasons, it has excelled everything in large size of fruit, and great size and vigor of plant, exciting amazement and admiration on the part of all who have seen it.

Season, medium to late .-- [Lovett's Catalogue.

STRAWBERRIES-(Continued.)

What Others Say.

"The largest and best strawberry in cultivation."—Ellwanger & Barry. The Sharpless is the biggest and best strawberry we know anything about."

-James Vick.

"The largest and best."-William Parry.

"It is uniformly the largest strawberry I know."-J. J. Thomas.

"All things considered, we place the Sharpless as first among the newer strawberries,"-E. S. Carman.

The "Sharpless" will undoubtedly prove a valuable acquisition. The berries are of enormous size and the vine a very strong, vigorous grower, surpassing in this respect any other variety in our collection.

Glendale..... \$1 00 per doz. \$5 00 per 100. \$35 00 per 1,000.

We quote from J. T. Lovett's catalogue : "I have now more frequent inquiries from fruit growers for a *really good late* strawberry than for anything else; one that is prolific, hardy, a good vigorous grower, good sized, AND FIRM ENOUGH TO SHIP WELL. After fruiting it two years, I think "Glendale" fills the bill. I am satisfied it possesses shipping qualities EQUAL TO THE WILSON if not SUPERIOR and it is fully a week to ten days later than the popular varieties now cultivated. With me it is not of extra large size—about like "Chas. Downing"—conical, quite long and tapering, very regular in form and size throughout the season, bright scarlet and colors all over at once, very free from anything like "green tip," with a very large light green calyx or burr, which is said to protect it from late frosts perfectly. Flavor rich, pleasantly sub-acid, with much of the sprightliness peculiar to the wild berry. Plant, a remarkably luxuriant grower, plants grown in hills attaining colossal proportions."

Somers Ruby......\$1 00 per doz. \$4 00 per 100. \$25 00 per 1,000.

A new variety combining large size, exquisite flavor, solidity of flesh, great beauty, and productiveness of plant.

Miner's Great Prolific, 75 cts. per doz. \$2 50 per 100. \$15 per 1,000.

We believe that the merits of this berry only need to be known, to gain for it a high position among our very best varieties. Berries large, to very large; color, deep crimson, of a rich, aromatic flavor; firm; ripens late, and holds out until very late. Plant a very vigorous grower, and very productive.

OTHER OPINIONS.

"Among the many new sorts, this has proven one of the most valuable."-J. T. Lovett.

"Has impressed me, both on my own place and wherever I have seen it, as a berry of exceeding great promise."—E. P. Roe.

"A valuable strawberry that will give great satisfaction."-Wm. Parry.

"I consider it a very valuable acquisition to the list of strawberries."—John S. Collins.

Mr. Collins states "that were he going to plant for fruiting for wholesale market, with his present knowledge, he would place Miner's Great Prolific first on his list."

"The best among forty or more varieties which I fruited the past season."-S. C. DeCou.

We have not seen enough of the fruit to allow us to express an opinion as to its value. The vine is a luxuriant grower with us, and as strawberries are not liable to scald here, we hope to make a good report in regard to it next season. It is worthy of a trial.

NOTE.—When so desired, strawberry plants at dozen rates, will be forwarded by mail, postage paid. Purchasers wishing strawberry plants in larger quantities sent by mail, will add to catalogue prices 25 cents for 50, and 40 cents per 100 for postage. Add to catalogue prices 20 cents per dozen, \$1 00 per 100 for postage on Raspberry and Blackberry plants. OUR PLANTS ARE FIRST CLASS.

Note.-We have made arrangements for a FINE and FULL stock of Orange and Lemon Trees, which we propose to sell at LOWEST PRICES.

Persons intending to plant, in large or small quantities, will do well to see our stock and get our prices.

We will furnish trees budded on either Orange, China Lemon, or Lime root, as the purchaser may direct. Our assortment will contain all the VERY BEST VARIETIES, well grown, healthy trees, free from scale or smut.

Also bearing trees, with samples of the fruit.

See our trees and judge for yourself.

ESTIMONIALS.

C. M. SILVA & SON :

SANTA CLARA, CAL., March 3d, 1878.

Dear Sirs: The box of roots and plants received in good order. Thanks fo promptness and liberality. The "Monarchs" are the largest and finest plants Yours, etc., I ever saw.

E. BURREL.

EAST OAKLAND, CAL., March 19th, 1878. "The plants arrived in first rate order." H. H. H.

NECHESVILLE, TEXAS, March 24th, 1879. Received the grape vines in fine order; they were actually growing in the Yours respectfully, J. H. P. package.

SAN BERNARDINO, CAL., December 29th, 1878. The strawberry plants I ordered of you for a friend, arrived in "capital order," he says, and he set them out at once, and will probably lose but few, if any, plants. He is well pleased with the assortment. W. G. W.

Yours truly,

BLACK'S STATION, YOLO CO., CAL., February 23d, 1879. Dear Sir: I received plants all right, strawberries not wilted. Thanks for J. S. R. Yours, etc., extras.

> OFFICE OF THE "VANCOUVER NURSERY," VANCOUVER (W. T.), April 11th, 1879.

The plants were received in a satisfactory condition. Thanks for taking so much pains to send a desirable assortment of strawberries.

S. W. BROWN, Proprietor.

DUTCH FLAT, CAL., April 14th, 1879.

The fruit trees you sent me during the past Winter are all growing finely. I have purchased trees, more or less, for the past fifteen years, and I will candidly say, that I never received a lot of trees of such uniform size and sound condition. The strawberry plants did not even wilt; every one is growing and some are in Yours, bloom.

H. A. FROST.

\$1 50 per doz. \$10 00 per hundred.

PRICE LIST-1880-81.

BLACKBERRIES,

Lawton,	-	50 cts. per doz.	\$2 00 per 100.	\$15 00 per 1000.
Kittatinny, -		75 cts. per doz.	2 00 per 100.	15 00 per 1000.
Wilson's Early,	-	\$1 00 per doz.	5 00 per 100.	

 $^\circ$ Berries of largest size ; the earliest of all good black berries ; very profitable for market.

RASPBERRIES.

Arnold's Orange, - - - \$1 00 per doz. \$5 00 per hundred. A large, good flavored yellow raspberry; soft; a strong grower and productive.

Brandywine, – – – 50 cts. per doz. \$2 50 per hundred. Particularly valuable on account of its firmness ; berries of medium size ; bright color and very firm ; flavor poor.

- - \$1 00 per doz. \$5 00 per 100. \$40 00 per 1000

Cuthbert,

Promises to become the leading market variety; berries of the very largest size; so very firm that they may be shipped hundreds of miles; flavor excellent -- best ; form conical: color rich crimson; very handsome. Last season, when our circular was issued, we had not seen it in fruiting, and we gave Mr. J. T. Lovett's description. Since fruiting it, we can endorse all that he said about

it. It is well worth a trial everywhere, and we believe will win a place in every collection. Our plants are *genuine* and *fine*.

What Others Say of It.

"I regard it as the best raspberry for general culture."—Chas. Downing. "In no other raspberry have I ever found united so many points of excellence. * * * It has been fruited North, South, East, and West, on all kinds of soil * * * it has proved of universal adaptability; succeeding every where, like the "Concord" grape, and "Bartlett" pear."—J. T. Lovett.

"I regard it as the best raspberry, for the country at large, that we have, and I have tested nearly 100 kinds. As far as I am able to judge, and as far as I can learn, the Cuthbert stands up head yet."—E. P. Roe.

"I place it first among red raspberries."-E. S. Carman, Editor Rusal New Yorker.

"It is better than all others, by long odds."-Dr. Farley.

"It is regarded as the best raspberry in existence."-Dr. Hexamer.

Queen of the Market, \$1 00 per doz. \$5 00 per 100. \$40 00 per 1000. So far as we can observe, does not differ in any regard from Cuthbert.

Reliance, - - \$1 00 per doz. \$4 00 per 100. \$25 00 per 1000. A seedling of "Philadelphia," superior in every respect.

Herstine, – – – 75 cts. per doz. \$2 00 per 100. \$15 00 per 1000. A superb berry. We have grown this variety for eight years, and it improves in our estimation every year; a strong grower, and the most productive of all; berrie larges, bright crimson, very handsome, fine flavor; a splendid variety for home use, and a very profitable variety for a near market.

Henrietta, - - - - - 65 ots. per doz. \$3 00 per 100. Identical with "Belle de Fontenay," and "Amazon." Berries large, deep red, firm and rich.

Very early, making it a profitable variety to grow for market; very productive; medium size, and very firm.

Philadelphia,			60 cts. per doz. \$2 00 per 100:
Thwack, -			75 cts. per doz. \$3 00 per 100.
Early Prolific,			\$1 00 per doz. \$5 00 per 100.
Red Antwerp,		50 cts. per doz.	\$2 00 per 100. \$15 00 per 1000.
Doolittle's Imp	proved,	,	75 cts. per doz. \$3 00 per 100.
Black cap; large a	nd produc	ctive.	

Mammoth Cluster, - - - - 75 cts. per doz. \$3 00 per 100. Large and fine flavored; enormously productive; black cap.

Ontario, – – – – – – – – 75 cts. per doz. \$3 00 per 100. Black cap.

STRAWBERRIES.

Exercise great care in the selection of varieties. The system for successful cultivation may be stated in a few words : Manure heavily, cultivate thoroughly, irrigate frequently. Keep free from weeds, and keep off runners. In planting, shorten the roots by cutting off about one half, and spread roots well out. Shortening them facilitates planting, and also causes them to start to grow quicker.

"A Manual on the Culture of Small Fruits," by E. P. Roe, tells how to plant, grow and market all kinds of small fruits.

"Success with Small Fruits," by E. P. Roe, is a beautiful and instructive work--the best on the subject we have ever seen. It is handsomely and profusely illustrated, and should have a place in every library.

Strawberry growers, especially new beginners, will find such works on the subject of great value.

Varieties.

The blossoms of all varieties offered are Bi-sexual, or Perfect, except those specified as Pistillate, or Imperfect, which are destitute of stamens, as shown by the accompanying cuts:

Bi-sexual, or Perfect,

Pistillate varieties should have a row of a Perfect-flowered variety planted every fifteen or twenty feet among them. When properly fertilized, some of the pistillate varieties are enormously productive. The pistillate varieties do not do well here, although they succeed well in some parts of this State.

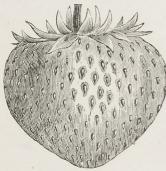

Pistillate, or Imperfect,

Leading Varieties.

Captain Jack, - - 40 cts. per doz. \$1 50 per 100. \$6 00 per 1000. Medium to large, uniform, bright red, firm, handsome, of poor flavor, a healthy, vigorous grower, and very productive. Highly profitable for market. Champion. - - 40 cts. per doz. \$1 50 per 100.

Pistillate, large, handsome, very productive, rather soft, and of poor flavor. **Crescent Seedling**, - -. 35 cts. per doz. \$1 25 per 100. \$5 per 1000. Immensely productive, size medium, rather soft, berries bright scarlet, flavor poor, Pistillate.

Cumberland Triumph, 40 cts. per doz. \$1 50 per 100. \$6 per 1000.

Camberland Triumph.

A superb variety, very large, smooth, and uniform, light scarlet; handsome, and of good quality, productive; vine, a strong grower.

Cinderella, 35 cts. per doz. \$1 50 per 100. Berries large, conical, and regular; bright, glossy scarlet; firm; of good quality; plant a strong grower and productive.

Duchesse. 50 cts. per doz. \$2 00 per 100. Early, large, uniform ; of fair quality ; productive.

Duncan, 50 cts. per doz. \$2 00 per 100 Of good size and quality; early; plant vigorous and productive.

Forest Rose, - - 50 cts. per doz. \$2 00 per 100. \$\$ 00 per 1000 Of large size, good flavor and color; very firm; very productive and was the earliest to ripen-by several days-of any variety in our collection. We think will prove a variety of great value, especially for this locality. Glendale.

50 cts. per doz. \$2 00 per 100. \$8 00 per 1000

Very late, large, very firm; a strong grower and very productive; valuable as a market berry on account of its lateness and firmness.

Glendale.

Great American. 50 cts. per doz. \$2 00 per 100 Very large and a very handsome berry; flavor fair; moderately productive. Jucunda. -50 cts. per doz. \$2 00 per 100 Extra large; regular in size and form; glossy crimson; very handsome; firm and of mild, pleasant flavor; requires heavy land and high culture. Miners' Great Prolific, - 50 cts. per doz. \$1 50 per 100. \$7 per 1000

Large to very large; globular, often irregular; deep crimson; good quality and moderately firm. A strong grower, with clean, healthy foliage, and so enormously productive that the berries are literally heaped about the plants. Late.

Miners' Great Prolific,

PRICE LIST-1880-81.

Monarch of the West, - 40 cts. per doz. \$1 50 per 100. \$5 per 1000 Extra large; pale red; excellent quality; plant vigorous; moderately productive; soft.

Neunan's Prolific, - - - 50 cts. per doz. \$2 00 per 100 The great Charleston berry; rather small; very early; firm and of bright color.

Seth Boyden, - - 40 cts. per doz. \$1 50 per 100. \$6 00 per 1000 Enormously large; regular; dark crimson; firm; sweet and good; plant vigorous and productive.

President Lincoln, - 50 ets. per doz. \$2 00 per 100. \$10 per 1000 Very large; handsome, firm, and of fine flavor.

President Wilder, - 50 cts. per doz. \$2 00 per 100. \$7 00 per 1000 A beautiful berry, and entitled to a place in every collection. We consider it the best flavored of all strawberries; does not succeed well in all localities, but where it does well, is a superb sort; large, very firm, juicy, rich, and delicious.

Sharpless, - - - 50 cts. per doz. \$1 50 per 100. \$7 00 per 1000. A mammoth variety in every respect. Berries uniformly very large, deep clear red, moderately firm, sweet and excellent. Vine a strong grower, and with us very productive. This variety has not been overrated.

New Varieties

Not yet tested by us, the descriptions given being those of Eastern growers. "Kirkwood. - - \$1 00 per dozen. \$4 00 per 100. \$25 per 1000.

"Has made, the past season, a most brilliant record. It is a seedling of Jucunda, and resembles that superb variety, both in fruit and plant. It is, however, far more vigorous, succeeding admirably, it is said, even on light soil. Although not of rampant growth with me, yet it is an excellent grower, with clean, healthy foliage, on soil where Jucunda can scarcely be made to exist. A gentleman in the southern part of the State (New Jersey), reports having grown upon a third of an acre 3,414 quarts of this berry, which sold for \$614 51. It is large, and is *late to very late.*"—Lovett's Catalogue.

Mt. Vernon, - - \$1 00 per doz. \$4 00 per 100. \$25 00 per 1000. Bears a close resemblance to Kirkwood, and may prove to be identical with that variety.

Longfellow.

- \$1 00 per doz. \$4 00 per 100

Promises well; a strong healthy grower, and prolific; berries, dark crimson, firm, of meaty consistency, and rich, sweet, sprightly flavor. It is a variety that will delight the amateur, and is possessed of qualities likely to make it highly prized by the market grower also.

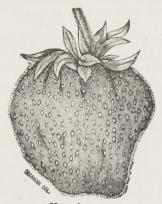

The illustration is a remarkably accurate representation of a medium sized berry.—Lovett's Catalogue.

Our cut is a fac simile of the one referred to in this description.

Red Jacket. \$1 00 per doz. \$3 00 per 100. Medium size, very dark crimson, very high flavored, possessing the sprightliness of the wild strawberry. Plant of very vigorous growth; *immensely* prolific, and although very early, continues fruiting until late in the season. On account of earliness, great productiveness, and surpassing excellence in point of flavor, of great value for the amateur, and were it firm, would be also for the market grower.

Marvin,

\$1 00 per doz. \$5 00 per 100. \$30 00 per 1000.

A seedling produced by crossing Jucunda with Wilson, and presents characteristics of both parents. It is large to very large, bright crimson, firm, good quality. A berry of extraordinary promise. Extremely late.

Marvin.

Garden,

\$1 00 per doz. \$4 00 per hundred. -"A seedling of Monarch of the West; large; fine flavor; undoubtedly the handsomest Strawberry grown. It took the first premium at the Queen's County Fair, N. Y., as the best seedling, in June, 1879."

Hart's Minnesota, -\$1 00 per doz. \$3 00 per hundred. Very productive; berries of large size; regular; color rich, dark red, with prominent seeds that make it handsome and attractive; flavor delicious.

Bidwell,

- \$2 00 per dozen. "As large as Sharpless, more abundant, firmer, and of much better flavor; bright, glossy crimson."

Huddleston's Favorite. - - 75 cts per doz. \$3 00 per 100. From the West. As productive as Crescent Seedling. Medium to large; late.

Warren, \$1 00 per doz. \$3 00 per 100. "Fruit of extra size; of good quality, and moderately early; vigorous and productive. A promising variety.

PRICE LIST-1880-81.

NOTE.—When so desired, Strawberry and Raspberry plants at dozen rates will be forwarded by mail, postage paid. Purchasers wishing Strawberry plants in larger quantities sent by mail, will add to Catalogue prices twenty-five cents for fifty and forty cents per hundred for postage.

Add to Catalogue Prices one dollar per hundred for postage on Raspberry plants.

Our plants are all first-class and carefully selected.

Please compare prices and quality with plants of other growers.

Parties wanting larger quantities than quoted in Catalogue, will please write for special prices.

ORANGES.

Best varieties, budded, - - - - - - 50 cts to \$4 00 each. Best varieties, seedlings, - - - - - 25 cts. to \$1 00 each.

LEMONS.

50 cts. to \$2 00 each.

Best varieties, budded,

We can furnish Orange and Lemon Trees of first quality at low prices. No scale or smut. Call and see our trees, and judge for yourself.

MISCELLANEOUS.

Pomegranates,			-	-	-		50 cts. each.
Loquat (Japan Pi	um,)		-	-		-	\$1 00 each.
Mulberries, -		-	-	-	-		\$1 00 each.
Rhubarb,	1	-	-	-			25 cts. each.
Asparagus, -							2 cts. each.

Cypress, Montere	y,	-	-	-		-	25 cts. each.
Pepper Trees,		-	-	-	-	25 cts. @	50 cts. each.
Roses,		-	-	-	-	25 cts. @	50 cts. each.
Chamærops Exce						75 cts. @	\$1 00 each.
Pritchardea Filif	era,	-	-	-	-	75 cts. @	\$2 50 each.
Any article not priced	l or quote	ed in	this	list, w	ill be fu	rnished at	the catalogue

Any article not priced or quoted in this list, will be furnished at the catalogue rates of other nurserymen. Persons wishing larger quantities than quoted herein, should write us for *special rates*. Address plainly,

C. M. SILVA & SON,

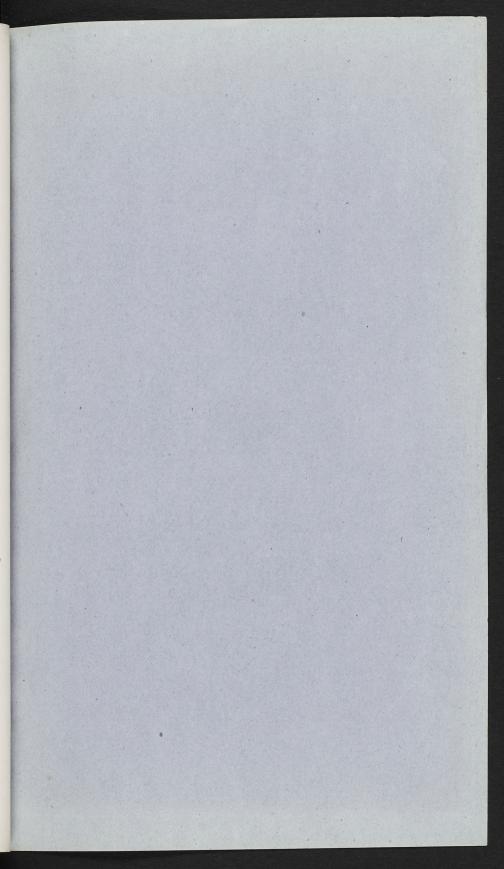

Newcastle, Placer County, CALIFORNIA.

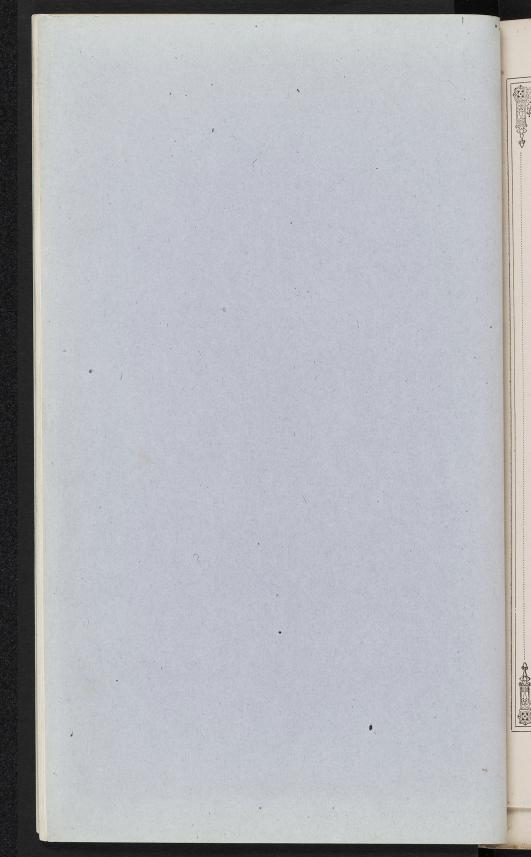

C. M. SILVA & SON, NEWCASTLE.

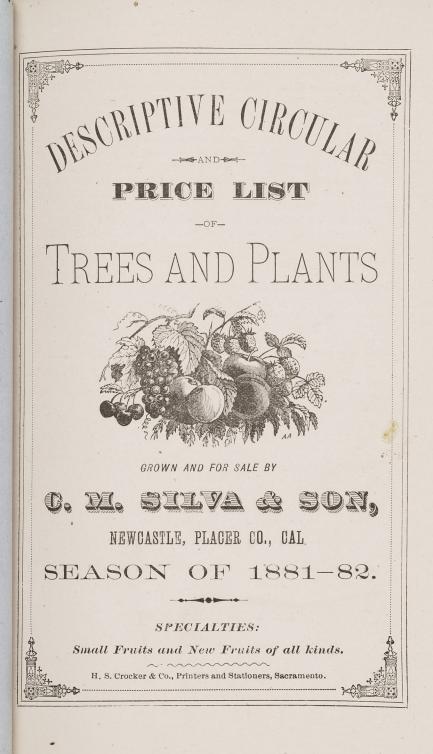

We deem it unnecessary to append a long list of testimonials. We have sent plants successfully to all parts of the country. We will guarantee the *safe arrival* of mail packages. It is to our advantage to deal liberally with our patrons. We shall do our best to give perfect satisfaction. We know our plants are first class and true to name.

C. M. SILVA & SON,

Newcastle, Placer County, CALIFORNIA.

WE return our sincere thanks to our many patrons for their orders in past seasons, and again present our little circular for consideration.

Our stock is larger and more varied than ever before, and we shall d our best to give entire satisfaction to all who favor us with their order

Planters will do well to *order early* as the demand for many varieties is very large and stocks will be quickly exhausted.

Those who intend planting, and are without experience in fruit growing in California, will do well to leave the selection of varieties to us, a many varieties that are first-class in other States do not succeed we here. Having had many years' experience in shipping fruits we claim to know what is needed and popular in the markets.

Terms: cash with order. Remittances may be made by draft a . Sacramento or San Francisco, postal order, registered letter, or exprese package.

All stock plainly labeled and carefully packed. A small charge with be made for packing, but all orders at retail prices amounting to \$50 or over will be packed free.

Please give plain and full directions as to how and by what route you wish goods shipped. Any mistake on our part in filling any order will be rectified if we are advised promptly.

We do not claim the right to substitute, but *unless ordered* otherwise when our stock of two year trees is exhausted, will fill orders with one year trees, or in filling small orders will substitute *similar* varieties for those we are out of.

The prices quoted herein are for the quantities specified, but hal dozen, fifty, and five hundred will be supplied at dozen, hundred, and thousand rates respectively.

Our leading specialty—Strawberry Plants—we can furnish in au quantity desired. Our plants are large and healthy; we select care fully and pack in the best possible manner.

The illustrations in this circular were furnished us by J. T. Lovet, Monmouth Nursery, New Jersey. They are not overdrawn, but actually resemble the varieties they represent.

Caution!--Do not buy from "Tree Peddlers," but send direct to some responsible nurseryman who has a reputation to maintain, and get what you order.

We have deemed it unnecessary to describe the old and well known varieties.

Every grower should be in possession of one or more works on fruits.

DOWNING'S FRUITS AND FRUIT TREES OF AMERICA,

BARRY'S FRUIT GARDEN,

ROE'S SUCCESS WITH SMALL FRUITS,

Are excellent works.

The many horticultural periodicals are valuable aids.

Alexander's Early,	Corinne,	Natchez Belle,
August 20th,	Day's White Cling,	Old Mixon Free,
Brigg's Red May,	Foster,	Parson's Early,
Brighton,	George's Cling,	Richmond,
Crawford's Early,	Hale's Early,	Salway,
Crawford's Late,	Large White Cling,	Twenty Ounce Cling,
Coloma Late,	Large Yellow Cling,	Thurber, etc.

Large, creamy white, with red cheek; delicious flavor; tree healthy and a strong grower.

ach	Gov. Garland
ach	Large, highly colored, similar to Alexander, but earlier; this and Wilder were the first to ripen on our place last season.
ing vet,	Geary's Hold On
	Splendid late yellow peach of the largest size; fine shipping variety.
ach	Hynes' Surprise
ach	A beautiful peach with white flesh; ripens about with Hale's Early, and in quality equal to that variety—freestone.
	Keysport White
lred	Large white, with blush cheek; very heavy bearer, and brings all its fruit to perfection.
	Prairie Gem
	Said to be a fine early sort; has not fruited with us yet.
	Picquet's Late
	Finer quality than Salway and comes in at same season; large, yellow freestone; bears its fruit near the larger branches, and is not liable to break down from overloading; heavy bearer.
each	Silva's Seedling
	Very large, red-cheeked peach; an excellent shipper.
lred	Shipley's Late Red
	Large, red peach; shape, round; ripens about with Salway; excellent.
	Silver Medal
	A large, late, white peach; one of the best for preserving.
	Snow
z ,	Beautiful, snow-white peach; excellent flavor; fine for home use; fruit, blossoms, and wood white.
	Sellers' Free
each	A large, yellow freestone of California origin.
lthy,	Waterloo
	Very early; similar to Alexander.

Wilder	o cus ea	aCH
--------	----------	-----

MO ato and

The best in quality of the early varieties, and as early as the earliest. This and Gov. Garland are our favorites among the earlies.

The latest good peach; white, with blush cheek; very large.

PLUMS AND PRUNES.

NOTE.-We have some fine thrifty cherry currant roots, of suitable size for sending by mail. These we will send at above price per dozen, Postage paid by us.

GOOSEBERRIES.

Houghton's and Mountain.

Small plants free by mail at each or dozen rates. No plants mailed at 100 or 1,000 rates.

BLACKBERRIES.

Lawton 50 cts. per doz.	\$2 00 per 100.	\$15 00 per 1000
Kittatinny75 cts. per doz.	2 00 per 100.	15 00 per 1000
Wilson's Early \$100 per doz.	500 per 100.	

Texas Ex. Early, 150 per doz. 10 00 per 100.

A wildling from Texas; large berry; prolific bearer, good flavor and firm; will prove very valuable on account of its extreme earliness, ripening as it does in advance of Wilson's Early, and equaling that fine variety in size. It has been tested by ourselves and many other growers in this vicinity.

Will send this and "Wilson's Early" free by mail, at rate per dozen. If other varieties are wanted by mail, add 20 cts. per dozen to catalogue price for postage.

RASPBERRIES.

Arnold's Orange......\$1 00 per doz. \$5 00 per 100 A large, good flavored yellow raspberry; soft in texture; very strong grower and productive.

r 100 \$25 per 1000

Promises to become the leading market variety; berries of the largest size, so very firm that they may be shipped hundreds of miles to market; flavor excellent--best; form conical; color, rich crimson; very handsome; strong, vigorous grower. Our plants are genuine and fine. J. T. Lovett says of the Cuthbert: "No other red raspberry has yet been introduced

that has proved of such general adaptability to different soils, exposures and elimates."

Queen of the Market...75 cts. per doz. \$3 per 100. \$25 per 1000 Same as Cuthbert.

A superb berry. We have grown this variety for several years, and it improves in our estimation every year. A strong grower, and the most productive of all; berries large, bright crimson, very handsome, fine flavor. A splendid variety for home use, and a profitable one for a near market.

Same as Belle de Fontenay and Amazon.

Pride of the Hudson......\$1 50 per doz. \$8 00 per 100

Is the finest flavored of all raspberries. Needs careful attention, and gives in return plenty of beautiful berries of the very largest size and exquisite flavor.

Highland Mardy.....60 cts. per doz. \$2 00 per 100. \$15 per 1000 Very early; productive, medium size, and firm.

Raspberries, at dozen rates, will be forwarded, postage paid, by mail, wherever desired.

If wanted at hundred rates by mail, add \$1 00 per 100 for postage. No plants mailed at 1000 rates.

STRAWBERRIES.

Great care should be exercised in the selection of varieties. The safest way is to plant but a few plants of a new variety, and test them fully before planting largely, unless you can rely on the person recommending them; and even then, success is not certain to follow, for there is no fruit in which soil and location make such a difference as with the strawberry; and the berry that is a perfect success here, may fail in other soils but a few rods distant.

We will in our descriptions and opinions of strawberries, **tell just** what we know of each variety, even though we know that an adverse opinion of some varieties may lose us the sale of thousands of plants.

The system for successful cultivation may be stated in a few words: manure heavily, cultivate thoroughly, irrigate frequently, keep free from weeds, and keep off the runners. In planting, shorten the roots by cutting off about one half, and spread the roots well out. Shortening them facilitates planting, and also causes them to start to grow quicker.

"A Manual on the Culture of Small Fruits," by E. P. Roe, tells how to plant, grow, and market all kinds of small fruits. "Success with Small Fruits," by the same author, is a beautiful and instructive work the best on the subject we have ever seen. It is handsomely and profusely illustrated, and should have a place in every library. Strawberry growers, especially new beginners, will find such works of much value.

VARIETIES.

The blossoms of all varieties offered are bi-sexual or perfect, except those specified as pistillate or imperfect, which are destitute of stamens, as shown by the accompanying cuts. •

Pistillate varieties should have a row of a perfect flowered variety planted every fifteen or twenty feet among them. When properly fertillized, some of the pistillate varieties are enormously productive for instance, "Crescent Seedling,"

"Champion," "Green Prolific," etc. Imperfect.

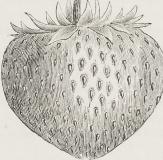

Bi-sexual or Perfect. The pistillate varieties do nothing with us, hence we cannot recommend them, although we learn that they succeed well in some parts of the State.

LEADING VARIETIES.

Captain Jack......30 cts. per doz. \$1 50 per 100. \$6 00 per 1000 Medium to large, uniform, bright red, firm, handsome; flavor rather poor; healthy, vigorous grower, and very productive. Highly profitable for market. Has given satisfaction to growers here during past season; bears well during the summer months.

Crescent Seedling (Pistillate)

25 cts. per doz. \$1 25 per 100. \$5 00 per 1000 Immensely productive, medium size, not firm; berries bright scarlet; inferior in flavor. Cumberland Triumph. .40c per doz. \$1 50 per 100. \$6 per 1000

A superb variety, very large, smooth, and uniform; light scarlet, handsome, and of good quality; productive; vine a very strong grower; bears well during the summer months.

Cumberland Triumph.

Forest Rose.....50 ets. per doz. \$2 00 per 100. \$7 50 per 1000 Of large size, good flavor and color, very firm; very productive, and the earliest to ripen, by several days, of any variety in our collection. We believe it will prove a berry of great value, especially in this locality.

Very late, large, very firm; strong healthy grower and productive; valuable as a market sort, on account of its lateness and firmness.

Miner's Great Prolific . . 50c per doz. \$1 50 per 100. \$7 per 1000

Large to very large; globular, often irregular; deep crimson; good quality and moderately firm; a strong grower, with clean healthy foliage, and so enormously productive that the berries are literally heaped about the plants; late. We regard this variety as one of the very best in our collection, and can confidently recommend it.

Miner's Great Prolific.

Monarch of the West, 35 cts per doz. \$1 50 per 100. \$5 00 per 1000 A well known variety; extra large; pale red; excellent quality; plant vigorous; moderately productive; rather soft; has become one of the leading market berries on this coast.

Seth Boyden.......35 cts per doz. \$1 50 per 100. \$6 00 per 1000 Berries of largest size; regular; dark crimson; firm; sweet and good; plant vigorous and very productive; a splendid market berry.

President Wilder...50 cts per doz. \$2 00 per 100. \$8 00 per 1000 A beautiful berry and entitled to a place in every collection; we consider it the best flavored of all strawberries; does not succed well in all localities, but where it does well is a superb sort; large, very firm, juicy, rich, and delicious.

NEW OR UNTESTED VARIETIES.

A new variety from Michigan; sent out with very high recommendations. The plant is a very strong grower and prolific; fruit very large, conical, with neck; firm and of excellent flavor; earlier than Sharpless, but we do not think will prove as fine a variety.

Beckert's Prolific......\$1 50 per doz. \$6 00 per 100 "A seedling of Jucunda; similar in all respects to that famous variety, except lighter in color; much more productive and ten days later, which makes it very valuable for extending the season."—J. Beckert & Bro.'s Catalogue.

British Queen (true)75 cts	per dozen
Duke of Edinburg75 ets	per dozen

Said to be a very heavy cropper; quality good; berries of immense size.

Plant very large; berries very large oblate; light scarlet; fine quality; very late; has proved profitable with some Eastern growers and is strongly recommended.

A strong, healthy grower and productive; berries dark crimson; very large; firm; of meaty consistency and rich, sprightly flavor.

The illustration is an accurate representation of a medium sized berry.

We believe this will prove a desirable variety in rich, heavy soils.

Longreite

1

š

A seedling produced by crossing Jucunda and Wilson, and presents characteristics of both parents. It is large to very large; bright crimson; firm; good quality; a berry of extraordinary promise; very late; does not succeed well on our light soil; we think will succeed in rich, heavy soil.

Prof. Ed. Pynaert\$1 00 per doz
Prof. Fred. Burvenich\$1 00 per doz
Phenomere\$1 00 per doz
Red Jacket
Medium size; very dark crimson; very high flavored, possessing the
sprightliness of the wild strawberry: plant of vigorous growth; immense-

sprightliness of the wild strawberry; plant of vigorous growth; immensely productive; very early; fine for amateurs, and were it firm, would be a fine variety for market.

TESTIMONIALS.

We deem it unnecessary to append a long list of testimonials. We have sent plants successfully to all parts of the country, and our trade is rapidly extending and increasing.

We will **guarantee the safe arrival** of mail packages. It is to our advantage to deal liberally with our patrons. We shall do our utmost to give perfect satisfaction. We can recommend our stock as being first class and true to name. Give us a trial.

C. M. SILVA & SON, NEWCASTLE, Placer County, California.

We will mail, postpaid, on receipt of price—50 cents—Roe's Manual on the Culture of Small Fruits. A valuable treatise in the planting, cultivation and marketing of small fruits.

FRUIT DRYER.

To all who are in need of a first-class FRUIT DRVER, we would recommend the

"R. E. BURNS" DRYER,

As reasonable in price, simple and effective—the best we have ever seen. A factory dryer of this kind can be seen at the orchard of Charles Gould, in this place.

We are interested in the county right for Placer County, and will be pleased to answer all inquiries in regard to them.

C. M. SILVA & SON, Nursergunen & Fruit Frowers

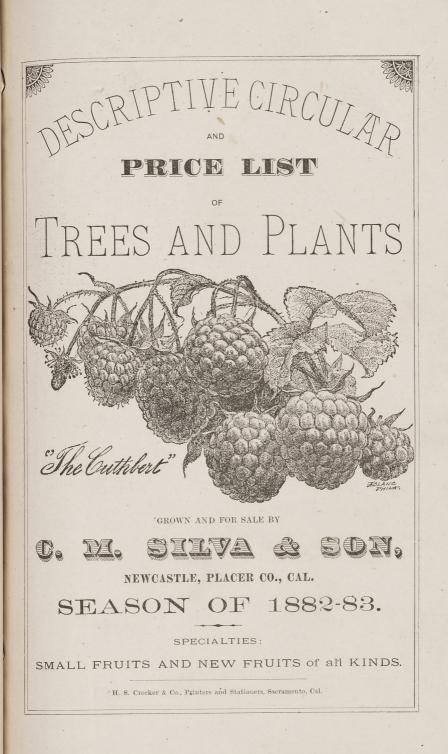

WHOLESALE DEALERS IN

CHOICE MOUNTAIN FRUITS.

Special Attention given to the Selection and Packing of Fancy Fruits for Distant Markets.

ORDERS SOLICITED AND PROMPTLY FILLED.

NEWCASTLE, CAL.

INTRODUCTORY.

Thanking our friends for their orders in seasons past, we again present our Circular for consideration, and solicit your further favors, promising to do our best, as we have always done in the past, to give satisfaction. Our stock is large, and in better assortment than ever before, and the past Summer having been unusually favorable to growth, our trees and plants are of fine quality.

The Placer Foothills are acknowledged to be one of the very best fruit-growing regions in California. Our locality, we consider peculiarily adapted to the growth of fruits of all kinds. Nearly every variety succeeds, and produces fruit of very best quality. Trees come early into bearing, and we are thus enabled to fruit and ascertain the value of the many new varieties with the least possible delay.

We make it a point to procure and test all new varieties which we consider worthy. Our orchard contains of peaches alone, over one hundred and fifty varieties, many of which are very promising.

We have many seedlings of merit, among them an early apricot which we believe will prove of much value, owing to its extreme earliness, excellent quality, and handsome appearance. * We shall not offer it until further tested.

Planters will do well to *order early*, as the demand for trees is very great, and already the stock of many varieties begins to run low. Those who intend planting, and are without experience in this business in Calfornia, will do well to leave the selection of varieties to us. We are and have been for many years, connected with the fruit-shipping business, and claim to know what is needed and popular in the markets.

We make a specialty of Small Fruit plants, and have all the new and leading varieties of merit. We call special attention to the "James Vick" Strawberry, and "Hansell" Raspberry, two new and very promising varieties, now being introduced. Our small fruit plants are of extra fine quality, and we can furnish in any quantity desired.

The illustrations in this circular are not imaginary, but actually resemble the varieties they represent. We do not claim any right to substitute other varieties than those ordered, but, unless ordered otherwise, when our stock of the age ordered is exhausted, we will fill orders with younger or older trees of the same variety, or in filling small orders will substitute similar varieties for those we are out of.

The prices quoted are for the quantities specified, but half dozen, fifty and five hundred will be filled at dozen, hundred, and thousand rates respectively.

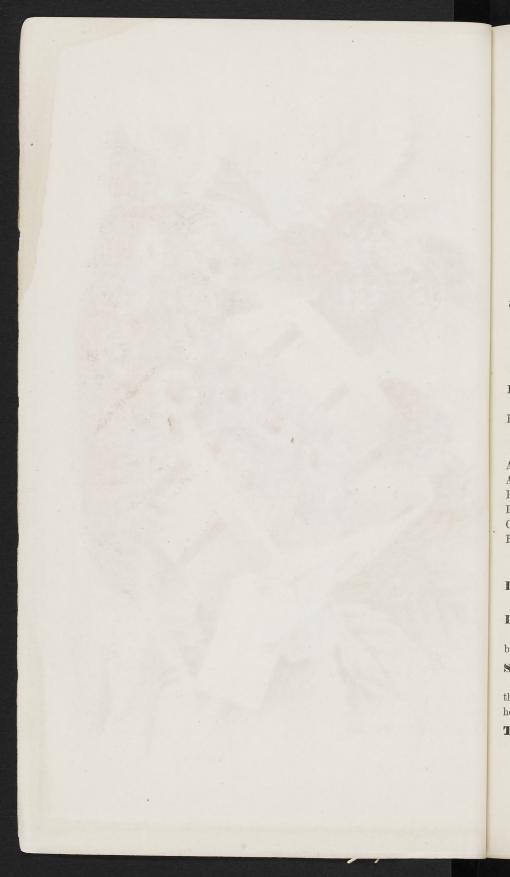

TERMS—Cash with order; remittances may be made by draft on Sacramento or San Francisco, postal order on *Newcastle*, registered letter or express.

All stock,"*labeled plainly*, and *carefully packed*. A small charge (sufficient to cover cost), will be made for packing.

Please give *plain* and *full directions*, how and by what route you wish goods shipped.

Any mistake on our part in filling any order, will be rectified if we are advised promptly.

A wildling from Texas; large berry; prolific bearer, good flavor and firm; will prove very valuable on account of its extreme earliness, ripening as it does in advance of Wilson's Early, and equaling that fine variety in size. It has been tested by ourselves and many other growers in this vicinity.

Crystal White	\$1.50 per dozen.
A novelty for home gardens.	Color, yellowish-white.

Taylor's Prolific......\$1.00 per dozen. Promises to be a fine variety for canner's uses.

RASPBERRIES.

Promises to become the leading market variety; berries of the largest size, so very firm that they may be shipped hundreds of miles to market; flavor excellent—best; form conical; color, rich crimson; very handsome; strong, vigorous grower. Our plants are genuine and fine. J. T. Lovett says of the Cuthbert: "No other red raspberry has yet been introduced that has proved of such general adaptability to different soils, exposures and climates."

Queen of the Market..75 cts. per doz. \$2 per 100. \$15 per 1000. Same as Cuthbert.

Highland Hardy. .60 cts. per doz. \$2.00 per 100. \$15.00 per 1000. Very early ; productive, medium size and firm.

SPECIAL ANNOUNCEMENT.

THE HANSELL RASPBERRY.

The earliest of all raspberries. Originated by the late Jas. S. Hansell, in Burlington county, New Jersey; has been fully examined by the leading Small Fruit Growers in New Jersey and adjoining states, and owing to its extreme earliness and other good qualities, unanimously pronounced "the most desirable and valuable raspberry in existence." It is believed to be as hardy as that iron-elad variety—the Turner; is a good grower and productive; while the fruit is of the brightest crimson, of superior quality, good size, and above all, very firm, having been shipped four hundred miles in good condition. This is uniting a vast deal in a single variety certainly, particularly when it is remembered that it

ripens, as it does, far in advance of all other kinds. It ripened its first berries in 1880 on June 4th, and on June 11th in 1881. The present season, when everything is nearly two weeks later than usual, it was ripe on June 20th, and afforded a good picking on the 26th—in all instances fully ten days ahead of the *Brandywine* by the side of it, with the same treatment. Of course, such a berry would command a high price in market, but this is not conjecture, as it has for the past three years—in fact, ever since shipped for sale—sold for twenty-five cents per pint, wholesale.

Judge Parry, who has introduced more varieties of this fruit than anybody else in America, and than whom no one knows more about raspberries, said at a meeting of Horticulturists held on the grounds where it originated, after inspecting *ten acres* of it in fruiting :

"This is my first sight of this berry although I have heard of it for several years. I am very much pleased with the appearance of it. It is proof in itself of its earliness, as everyone who has witnessed it can bear testimony. It is of fair size, fine color, and because of its firmness of flesh must carry well, look well and sell well in the market. It possesses all of these essential and most desirable qualities, and from appearance it must be perfectly hardy, as there has been no protection whatever to it. It stands exposed on soil not particularly well suited to grow raspberries, but on fair farm land, that gives assurance that it will do well anywhere that a hardy raspberry will grow. I think it will be an acquisition among small fruits, coming in earlier than any raspberry, black, white, purple, or any color; it stands single and alone, and above all competition. At the present time I think there is no other raspberry that can compete with it in all the qualities that are desirable for a raspberry for the market."

[From the Rural New-Yorker.]

The Rural New-Yorker takes a pardonable pride in being the first to present life-like illustrations of new fruits which give promise of filling a hitherto unoccupied place or that show decided improvements over older kinds. We now present a fancy sketch of the new Hansell Raspberry, fancy in the arrangement, but very accurate as to the berry itself. In what respects is it superior to well-known varieties? In the one respect of earliness. It is believed to be, by trustworthy judges, the earliest red raspberry known. The berries are very firm, of a bright red color, and good in quality, as we ourselves can testify—while as to hardiness, it has never as yet, we are told, been injured in the grounds of its origin, viz: the farm of the Hansell Brothers.

Plants of the Hansell will be furnished as follows: \$2.00 per six; \$3.00 per dozen; \$18.00 per hundred. If to be sent by mail, add 25 cents per dozen for postage.

STRAWBERRIES.

Great care should be exercised in the selection of varieties. The safest way is to plant but a few plants of a new variety, and test them fully before planting largely, unless you can rely on the person recommending them; and even then success is not sure to follow, for there is no fruit in which soil and location make such a difference as with the strawberry; and the berry that is a perfect success here, may fail in other soils but a few rods distant.

We will in our descriptions and opinions of strawberries, **tell just what we know** of each variety, even though we know that an adverse opinion of some varieties may lose us the sale of thousands of plants.

The system for successful cultivation may be stated in a few words: Manure heavily, cultivate thoroughly, irrigate frequently, keep free from weeds, and keep off the runners. In planting, shorten the roots by cutting off about one-half, and spread the roots well out. Shortening them facilitates planting, and also causes them to start to grow quicker.

"A Manual on the Culture of Small Fruits," by E. P. Roe, tells how to plant, grow, and market all kinds of small fruits. "Success with Small Fruits," by the same author, is a beautiful and instructive work the best on the subject we have ever seen. It is handsomely and profusely illustrated, and should have a place in every library. Strawberry growers, especially new beginners, will find such works of much value.

VARIETIES.

The blossoms of all varieties offered are bi-sexual or perfect, except those specified as pistillate or imperfect, which are destitute of stamens, as shown by the accompanying cuts.

Perfect.

Pistillate varieties should have a row of a perfect flowered variety planted every fifteen or twenty feet among them. When properly fertilized, some of the pistillate varieties are enormously productive—for instance, "Crescent Seedling," "Champion,"

Pistillate or Imperfect.

"Green Prolific," etc. The pistillate varieties do nothing with us, hence we cannot recommend them for this locality, although we know that they succeed well in some parts of the State.

LEADING VARIETIES.

Captain Jack...... 35 cts. per doz. \$1.50 per 100. \$6.00 per 1000. Medium to large, uniform, bright red, firm, handsome; flavor rather poor; healthy, vigorous grower, and very productive. Highly profitable for market. Has given satisfaction to growers here during past season; bears well during the summer months.

Crescent Seedling (Pistillate)

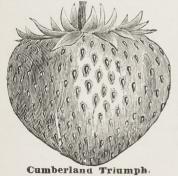

35 cts. per doz. \$1.25 per 100. \$5.00 per 1000. Immensely productive, medium size, not firm; berries bright scarlet; inferior in flavor.

Very large and productive. Color, bright, glossy crimson; very firm and of excellent flavor. Promises to succeed in a great variety of soils.

Bidwell.

Cumberland Triumph...... 50 cts. per doz. \$1.50 per 100.

A superb variety, very large, smooth and uniform; light scarlet, handsome, and of good quality; productive; vine a very strong grower; bears well during the summer months.

Very late, large, very firm; strong, healthy grower and productive; valuable as a market sort, on account of its lateness and firmness.

Kirkwood.

Plant very large; berries very large, oblate; light scarlet; fine quality; very late; has proved very profitable with some Eastern growers and is strongly recommended.

Longfellow.

Marvin.

A strong, healthy grower and productive; berries dark crimson, very large, firm; of meaty consistency and rich, sprightly flavor.

The illustration is an accurate representation of a medium sized berry.

We believe this will prove a desirable variety in rich, heavy soils.

A seedling produced by crossing Jucunda and Wilson, and presents characteristics of both parents. It is large to very large; bright crimson; firm; good quality; a berry of extraordinary promise; very late; does not succeed well on our light soil; we think it will succeed in rich, heavy soil.

Monarch of the West...35c. per doz. \$1.50 per 100. \$5 per 1000. A well known variety; extra large; pale red; excellent quality; plant vigorous; moderately productive; rather soft; has become one of the leading market berries on this coast.

Miner's Great Prolific. . 50c. per doz. \$1.50 per 100. \$7 per 1000.

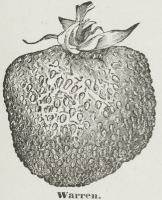

Large to very large; globular, often irregular; deep crimson; good quality and moderately firm; a strong grower, with clean, healthy foliage, and so enormously productive that the berries are literally heaped about the plants; late. We regard this variety as one of the very best in our collection, and can confidently recommend it.

Miner's Great Prolific.

President Wilder. 50 cts. per doz. \$2.00 per 100. \$8.00 per 1000. A beautiful berry and entitled to a place in every collection; we consider it the best flavored of all strawberries; does not succeed well in all localities, but where it does well is a superb sort; large, very firm, juicy, rich and delicious.

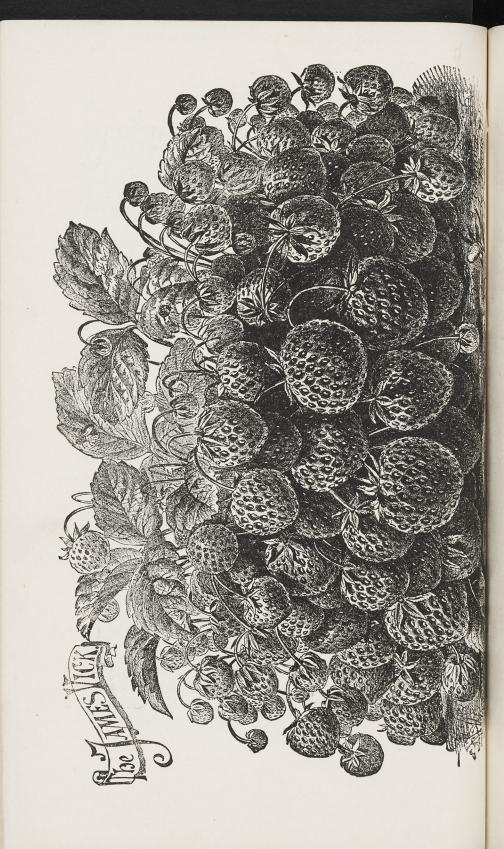

Triomphe de Gand. .50c. per doz. \$2.00 per 100. \$10.00 per 1000. An old favorite in the market, being very large, handsome, and of fine flavor, and the firmest of all. We have a limited stock of extra strong, healthy plants.

Warren...... 50 cts. per doz. \$2.00 per 100. \$10.00 per 1000.

We have a better opinion of this variety than when our last catalogue was written. The past summer it produced plenty of fine, large berries, of very handsome appearance. Plant very vigorous and productive.

VARIETIES NEW OR NOT FULLY TESTED.

The points of merit of the "James Vick" are briefly:

1. Fine quality, unusual vigor, and hermaphrodite (or perfect) blossoms.

2. Color, form and firmness of berry, which approach the ideal. No white tips, no coxcombs.

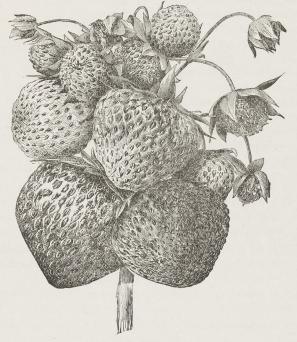

3. Ability to stand on the vines for a week after ripening, without becoming soft, or rotting, or losing quality, or much lustre. Instead of softening, it shrinks a triffe, and becomes firmer than when first ripe.

4. Uniformly large size, and productiveness unequaled by any other variety. Two hundred and eighty berries were counted on one average plant, and from one row about one hundred feet long, nearly two bushels of berries were gathered.

Charles A. Green writes: "This berry has the constitution to succeed over a large extent of country."

20

Manchester \$1.00 per doz. \$5.00 per 100. \$30.00 per 1000.

Manchester.

Mr. Peter B. Mead, the eminent pomologist and popular horticultural writer, describes this new and entirely distinct strawberry pomologically thus:

"Form, oblate-conical. Size, large. Color, scarlet. Flesh, pink, firm but melting, with a rich sub-acid juice, and a decided aromatic flavor. Leaf-stalk, reddish, as are also the runners. Flower-stalk, stout. Flower, pistillate or imperfect. Plant, robust and very productive. Quality, very good to best. The plant is seemingly well adapted to very light soils, and will doubtless find itself at home throughout a wide range of country, and prove itself to be especially valuable for market, whether near or distant."

Although perfection has never been attained in a fruit, and perhaps never will be, still, varieties like the Bartlett Pear, Baldwin Apple, Concord Grape and Cuthbert Raspberry, unite so many points of excellence, both in tree or vine and in fruit, and thus approach so closely the ideal fruits of their respective kinds, they must ever be subjects of profound wonder to all reflecting minds; the thought ever recurring, "How was their existence ever brought about?" Such an acme among strawberries yet remains to be introduced. Some may claim that Wilson's Albany is this, yet it is not. While we freely concede to it much veneration for the good it has done in extending the culture of the strawberry, although it is firm, and has proved adapted to a wide range of soils and climates, and was formerly large and productive, yet it never has been fit to eat, as generally picked, judged as a strawberry should be judged. It is not claimed that the **Manchester** is a *perfect* strawberry—but it *is* believed that it is *nearer* so than any variety that has yet been disseminated. In fact, it is with complete confidence we make the broad claim that it is "the greatest strawberry on earth," and because:

1. It is supremely firm, keeping its color and flavor and *remaining* firm longer than any other variety.

2. It is large and exceptionally uniform throughout the season.

3. In shape it is as near perfect as can be desired, and remarkably uniform; resembling Cumberland Triumph.

4. It is exquisitely beautiful, being of the most brilliant, charming scarlet imaginable, with smooth surface and prominent bright golden seeds. It ripens all over at once.

5. It is of superb quality—being much sweeter and richer than any other *productive* variety.

6. It is wonderfully prolific—producing fully double as much as the Wilson.

7. It is a very vigorous grower, with large, luxuriant, glossy foliage, and putting out large pink runners.

8. It continues in fruit for a long season, commencing to ripen with Charles Downing, and continuing until very late, bringing up the last blossoms to perfect berries.

9. It endures drought better than any other variety.

10. Its fruit-stalks are tall and very strong, admitting of mulching, and in a great measure holding the fruit from the ground.—Lovett's Catalogue.

PLEASE NOTE CAREFULLY

That all our plants are large and healthy, and carefully selected.

That "1 doz." plants means more than 12, and they are selected.

That the descriptions of the new and untested varieties are those of other growers.

That we do not recommend any variety that we think will prove unworthy.

That we advise planting new and unknown varieties sparingly.

- That we send all strawberry plants by mail prepaid, at dozen rates; if ordered at hundred rates, add 20 cents per 50, 40 cents per 100 for postage.
- That Currant, Gooseberry and Blackberry plants by mail must necessarily be small in size, and we recommend sending them by express. If wanted by mail, add 25 cents per dozen for postage.
- That Raspberry plants, of first quality, can be sent by mail; add 25 cents per dozen for postage. Add 25 cents per dozen for postage on Grape roots.

Parties wishing larger quantities than quoted herein will please write for special prices.

TREES, PLANTS, ETC.

GROWN AND FOR SALE BY

C. M. SILVA & SON,

NURSERYMEN,

NEWCASTLE, PLACER CO, CALIFORNIA.

SEASON OF 1883-84.

SPECIALTIES:

Small Fruits and New Fruits of all Kinds.

SACRAMENTO: H. S. CROCKER & Co., PRINTERS AND STATIONERS. 1883.

INTRODUCTION.

We return our thanks for the patronage we have been favored with in the past, and present our catalogue for the present season for your consideration. We shall always work hard to fill all orders satisfactorily. Our stock is larger than ever before, and our trees have had very close attention, and have made a splendid clean growth.

The Placer county foothills are acknowledged to be one of the very best fruit-growing regions in California. Our locality we believe to be peonliarily adapted to the growth of fruits. Although last Spring the frost denuded many orchards within a radius of a few miles, of all their fruits, even of the hardy varieties, such as Apples and Pears, no fruit, even of the tenderest kinds, was injured in our orchard. Nearly every variety succeeds, and produces fruit of the best quality. Trees come into bearing at an early age, thus giving us excellent opportunities to fruit, and ascertain the value of the many new varieties with the least possible delay.

We make it a point to procure and test all the new varieties which we consider worthy. Our experimental orchard contains of Peaches alone over one hundred and fifty varieties, many of which are very promising. We have numerous new and untested varieties of Plums, Prunes, Apples, Pears, Apricots, Cherries, Almonds, etc.

We have several Seedling Peaches of merit, and are fruiting every year numerous Seedling Peaches and Apricots. We fully believe we have the EARLIEST and BEST Apricot in cultivation, and are planting it largely for fruiting. Under the proper head, we give a full description.

We make a specialty of small fruit plants, and have growing all the leading and new varieties of merit. We callspecial attention to the James Vick Strawberry, Hansell Raspberry, and Fay's Prolific Red Currant—all new varieties of great promise.

The illustrations in this circular are not imaginary, but *actually resemble* the varieties they represent. We do not claim any right to substitute other varieties than those ordered, but, unlesss *ordered otherwise*, when our stock of the age ordered is exhausted, we will fill orders with younger or older trees of the same variety, or in filling small orders will substitute similar varieties for those we are out of.

The prices quoted are for the quantities specified; but half dozen, fifty and five hundred will be filled at dozen, hundred, and thousand rates respectively.

TERMS—Cash with order; remittances may be made by draft on Sacramento or San Francisco, postal order on *Newcastle*, registered letter or express.

[^] All stock *labeled plainly*, and *carefully packed*. A small charge (sufficient to cover cost) will be made for packing.

Please give *plain* and *full directions*, how and by what route you wish goods shipped.

Any mistake on our part, in filling any order, will be rectified if we are advised promptly.

Please note that the descriptions of all the new varieties, or varieties that have not yet fruited here, are those given by the disseminators or by the catalogues of reliable nurserymen. We purchase our new varieties of the best and most reliable nurserymen in the United States. Many of the varieties of fruit that do well in the Eastern States do not prove a success in California, and we do not recommend the extensive planting of untried varieties; but we do advise every fruit-grower to cautiously test for himself all the varieties of promise. This can be done by the purchase of a single tree well cared for, and such experiments prove a source of pleasure as well as profit.

C. M. SILVA & SON, Newcastle, Placer Co., Cal.

PEACHES.

(Except when noted).

- Alexander's Early—One of the best of the very early varieties; quite large; very rich red color, and tree free from disease; half cling. May and June.
- Hale's Early Medium size; greenish white, with bright red cheek; quality good; a popular market variety in this vicinity; freestone. June.
- Foster-Very large; yellow; of best quality; very popular for home use or market; freestone. July.
- Crawford's Early-Very large; yellow, with red cheek; the popular market variety; freestone. July.

Susquehannah-Very large; rich yellow, with a fine blush; flesh yellow; one of the finest yellow varieties. August.

Catalogue of Fruit Trees, Plants, Etc.

4

Stump the World-Very large; creamy white, with bright red cheek; flesh white, juicy, and high flavored; very productive; one of the best market varieties; the most popular white-fleshed Peach wherever known. August.

- Old Mixon Free-Large; white, with red cheek; flesh white, tender, rich, and juicy; an old favorite. August.
- Crawford's Late-Very large; yellow, with red cheek; popular for market. August.

Corinne-Verylarge; bright red; an excellent shipping variety; hangs on the tree a long time. Last of August.

Morris White-Above medium size; creamy white; very slight blush on one side; fine for canning. August.

Salway-Very large; yellow, with red cheek; tree healthy, and a regular bearer; ripens after glut of peaches is gone. September.

CLINGSTONES.

Orange-Very large; yellow, with red cheek; fine. August.

Twenty-ounce—The largest Peach we have ever grown; rich orange yellow, mostly covered with crimson; flesh bright yellow, juicy, and excellent; very desirable. August. Fifty cents each.

Ward-Large; white fleshed, with red cheek. August. Fifty cents each Old Mixon-Large; white, with red cheek; juicy and high flavored. August.

Heath-Large; white flesh; superior flavor. September.

George's Late Cling—Large; beautiful; mostly covered with red; good flavor; very popular in the San Francisco market. September.

Lemon-Rather large; pale yellow, with slight blush. September.

NEW OR SCARCE VARIETIES.

Hynes' Surprise-The earliest and best early *freestone*; ripens slightly in advance of Hale's Early, and in every way superior as a market variety; color greenish white, covered with crimson on side next the sun; a very beautiful Peach, and an excellent shipping variety. We shall plant more of it for fruiting than of any other variety.......50 ets. each. Chinese Cling-Large; creamy white; beautifully mottled; flesh white,

juicy, high flavor; finest for home use, but too tender for market...... 50 cts. each.

Hance's Golden Rareripe—An excellent Peach for a near market, the quality being choice; round, of a good size; yellow fleshed; tree healthy and a good bearer; very desirable. Early August....Price, fifty cents.

Golden Chance—A seedling of our own, resembling Late Crawford; very rich clear yellow, with brilliant crimson cheek; a few days earlier than Late Crawford, and much better quality, and being finer grained, is a much better shipping variety; has fruited with us two seasons.... 75 cts. each.

Golden Eareripe—Fruit very large; yellow, with red cheek; quality good; tree a strong grower and productive. August......50 cts. each Large Yellow Cling—Large; yellow fleshed and fine. Last of August 50 cts. each.

Jones' Seedling—The largest yellow fleshed freestone Peach ripening in our orchard this season. We sent several boxes to different parties who are accustomed to see choice fruits, and they were pronounced universally the "finest we ever saw." Very large; yellow fleshed; red cheek; very firm and fine for shipping. We learn that there is another Jones Seedling, which is inferior to the one grown by us. August.... 75 cts. each.

Brandywine—A large yellow freestone Peach with red cheek; ripens just after Late Crawford, and we regard it as more desirable. August. 50 cts. each.

Sellers' Free—A new variety from Contra Costa County; handsome, large, yellow market variety; tree free from leaf-curl. August...... 50 cts. each.

6

Silva's Seedling - Very large, oblong, greenish white, with red cheek: quality good; skin very thick and tough; has proven to be a fine ship-Geary's Hold On-A fine yellow Peach, of the largest size; ripening Picquet's Late-Fruit large to very large; round; sometimes a little flattened; skin yellow, with a red cheek; flesh yellow, sweet, rich, and excellent in quality; the best of all the late peaches; freestone; ripens Shipley's Late Red-A very desirable red Peach, with white meat: large, handsome, and firm; ripens about same time as above..... 40 cts. each. Keysport Late White-Large; white to the seed; skin white, with delicate blush; quality excellent; bears heavily, and carries its fruit to Silver Medal-Very large; late; pure white; a splendid variety for can-Brighton - Very large; oblong; greenish white, with slight blush; shy Bilyeu's Late October--Very large when grown to perfection; white, with a red cheek; flesh white; very firm. Its extreme lateness, large size, and good shipping qualities, make it very valuable...50 cts. each.

PEARS.

(Except when noted).

SUMMER AND FALL VARIETIES.

Madeleine — Medium; yellowish green; very juicy and sweet; a fair grower and productive; the best of the very early Pears.

Beurre Giffard — An excellent early Pear; larger and better than Madeleine, and ripens shortly after it.

Dearborn's Seedling-Medium size; pale yellow; flavor delicious.

Bartlett—Needs no description; popular everywhere for shipping, drying, and canning.

Flemish Beauty-Large; pale yellow, with reddish brown cheek. September.

Seckel-Small, brownish yellow, sweet, rich, and excellent. September.

Beurre Hardy—Large; greenish yellow, with light russet; bears transportation well; early. September.

- Duchess de Angouleme-"Very large; dull yellow; tree upright and vigorous. September.
- Beurre Clairgeau—Very large; skin yellow, shaded with orange and erimson; covered with russet dots. The size, early bearing, productiveness, and exceeding beauty, render this a valuable sort. September and October.

Beurre de Anjou—Large; russety-yellow; often with a fine red cheek; productive and vigorous; valuable for shipping. October and November.

WINTER VARIETIES:

Doyenne de Alencon-Large; rich color; "fine flavor; keeps till midwinter; valuable as a shipping Pear.

Winter Nelis-Medium size; yellow, with gray russett; very juicy and of the highest flavor. The best Winter Pear, and valuable for market. Glout Morceau-Large; pale yellow; fine grained.

Easter Beurre-Large; fine grained; of excellent quality; a late keeper.

NEW VARIETIES.

Souvenir du Congress—A new large Summer Pear, ripening a little before the Bartlett; skin smooth; yellow, with a lively red cheek; resembles Bartlett in quality; flesh harder in texture. August..\$1 each. Keiffer's Hybrid—Large; roundish oval; skin deep yellow, a few

patches and nettings of russet. Fruit of good quality, wonderfully showy, and is valuable for the table and market; promises to become an excellent variety for canning; never rots at the core. Tree remarkably vigorous and handsome, having large, dark green, glossy leaves, and is an early and very prolific bearer. September......\$1 50 each. Sheldon—Medium to large; yellowish russet, with a fine red cheek; fine

quality. October......\$1 each.

PLUMS.

Cherry-Earliest; medium size plum; pale red; sweet, juicy, sub-acid. Peach Plum-Very large; reddish brown color; nearly round; very

- handsome; freestone. Fine for market. Ripens June and July.
- Washington—Large; nearly round; pale yellow, with blush in the sun. This plum is deservedly popular everywhere. It is one of the very best for market or for drying, whether in the sun or by artificial heat. The Washington parts freely from the pit, and the tree is a great and constant bearer. July.
- Duane's Purple-Large; oval; deep purple. Ripens early in the season, and is valuable for market or for drying. Freestone. July.
- Bradshaw-Very large; purple; juicy, pleasant flavor; flesh adheres to stone. The tree is a strong grower and great bearer. July.
- Yellow Egg-Very large; yellow; clingstone; not high flavor. Tree bears enormous crops. Very popular as a canning variety. August.
- Columbia-Very large; purple; round; fine flavor, parts from the stone; is one of the best for drying. August.

Jefferson-Large; oval; yellow with slight blush on sunny side. Freestone. Valuable for market or drying. August.

Green Gage—Small; nearly round; green with golden dots in sun. Fruit of the very best quality. Tree a poor grower but bears freely. August.

- Victoria—An English variety of largest size; beautiful light purple color; sweet but not high flavor. A fine sort for market. Freestone. August.
- Quackenboss-Very large; nearly black when ripe; adheres to the stone. Ripens rather late in season, and is a good market sort. August.
- Shropshire Damson-Small; almost black; juicy; sub-acid. Fine for preserving. August and September.
- Coe's Golden Drop—An old English variety of superior excellence. Large; oval; pale yellow with dots of rich carmine on sunny side; flesh juicy and rich, adheres to the stone. Ripens late, about middle of September in the coast counties. Very valuable for canning. September.
- Ickworth's Imperatrice—Above medium; dark purple; very firm, sweet and rich. This plum hangs long on the tree, bears transportation long distances, and is therefore valuable for shipment. September and October.
- Coe's Late Red-Medium size; round; red; hangs a long time on the tree. October and November.

PRUNES,

- German Prune-Medium size; long oval; purple. Makes an excellent dried prune. Free. Very popular in the market. August.
- Hungarian Prune (English Pond's Seedling)—Very large; oval; pale
 red; very prolific. Clingstone. A good market prune. August and September.
- Petite Prune d'Agen (French Prune)—Medium size; purple; very sweet, and probably the best prune we have for the purpose of making dried prunes. Parts freely from the stone. August and September.
- Felenberg—A late prune of full medium size; freestone, and one of the best for market or drying. September.

PLUMS AND PRUNES-NEW OR SCARCE VARIETIES.

- Botan-Ogon-These two varieties, received from Japan with no description other than "these are the two best varieties of Plums grown in Japan," we have not fruited them, but we believe they will prove worthy. They are vigorous growers, and are said to be early bearers. 75 cts. each.
- Prince Englebert—A very large Prune, fruited by us this season. It is a freestone, and of the best quality; tree a strong grower. 75 cts. each.
 Prune de Agen (Robe de Sergeant)—A variety from France; medium size; oval; slightly necked; skin deep purple; flesh greenish yellow, sugary, rich, and delicious; adheres to the stone slightly; an excellent drying and preserving Prune. From this variety are made the cele-

brated "Pruneaux de Agen......75 cts to \$1 each

NOTE.—Beware of spurious trees of this variety. The tree and fruit closely resemble Coe's Golden Drop, and many of this variety will be packed for the Silver Prune.

CHERRIES.

First-class, 2	years	 	 	0 cts. each.
First-class, 1	year	 	 cts. each,	\$30 per 100

Early Purple Guigne-Medium size; dark purple; juicy and sweet; the earliest, and very valuable as an early nariety.

Early Richmond-Medium size; tart, but tender; valuable for canning. Governor Wood-Large; light yellow, shaded with red; juicy and de-

licious; one of the very best.

IO

Black Tartarian-Very large; black; sweet and juicy; the leading market variety.

Elton—Large; yellow, mottled with red when ripe; good flavor and fine for canning; an abundant bearer.

Luelling (Black Republican — Black Oregon)—Originated in Oregon; supposed to be a cross between Royal Ann and Black Tartarian; large; black; very late; flesh exceedingly firm, and ships well to distant market; very profitable.

Royal Ann (Napoleon Bigarreau)—Very large; yellow, with red cheek; very firm flesh; very late; valuable market cherry.

NEW AND SCARCE VARIETIES.

IΙ

APRICOTS.

Moorpark-The largest and best of all Apricots; freestone; late.

NEW AND SCARCE VARIETIES.

- Newcastle Early—(Originated in our orchard, and we believe it to be the earliest of all Apricots; ripens here with Woods' Early, and is every way superior in size and quality; size, full medium, round; rich golden yellow, with brilliant red cheek in the sun; freestone; flavor sweet and rich; tree a heavy bearer and healthy; has fruited with us three seasons, and this past season we had fruit on fully twenty trees in the nursery. We shall offer no trees, buds, or grafts for sale this season. We intend planting for fruit the few hundred trees we have now.)

(Except wh	ere not	ed.)			

- Black Ferrar-The firmest good grape we have; very late, and keeps well.
- Black Hamburg—Berries and bunches large; early and good; popular in the market.

1

Black Morocco-Berries very large; very late; keeps and ships well.

Flame-colored Tokay-Bunches and berries very large, firm and sweet; very popular in market.

Purple Damascus—Very large; the most popular of all the dark colored grapes.

White Reissling—Bunches medium size; berries small; greenish yellow. A first class wine grape.

Rose de Peru-Very large bunches; berries large, roundish, brownishblack; valuable market grape, and sure bearer.

- White Muscat of Alexandria—Bunches and berries large, oval, sweet and rich; fine muscat flavor; popular as a market grape and for making raisins.
- **Muscatella Gordo Blanco**—Closely resembles the preceding variety, claimed by some to be superior for raisins.
- small and free from seeds; makes fine currants.

25 cts. each; \$2 per dozen; \$10 per 100. Zinfindel—Valuable wine grape.

GRAPES—AMERICAN.

(25 cents each; \$2 per dozen, except where noted.)

Catawba—Large; coppery-red; berries rich, vinous, musky flavor. Clinton—Small black berries, fine, sprightly, vinous flavor. Isabella—A strong-growing variety, especially adapted for arbors. Berries dark purple, with a rich musky flavor.

migminuter-new; very large and late	ΦL	each.
Newburgh-New; said to be a very choice variety	\$1	each.
Wyoming Red-New; said to be very fine flavored	ets.	each.

CURRANTS.

(Except where noted).

Black Naples—Berries large and black.
Cherry—Very large; the leading market variety.
White Grape—Bunches and berries large; whitish yellow; sweet, and best flavor.

16

Fay's New Prolific—Color rich red, as compared with the Cherry Currant. Fay's Prolific is equal in size, better in flavor, with much less acid, and five times as prolific; also, from its peculiar stem, less expensive to pick. Another season's experience has fully proven all that was claimed for this magnificent fruit. Our plants are obtained direct from head-

quarters, and can be relied on as genuine.

(For full description, with accurate illustration, see Special Circular). 2 years old..\$1 00 each; \$10 per doz. 1 year old..76c. each; \$7 50 per doz.

GOOSEBERRIES.

50 cts. each, \$5 per dozen.

BLACKBERRIES.

Lawton-Very large, and most productive of all..50 cts. doz., \$2 per 100 Kittatinny-Very large and delicious; leading market variety..... 50 cts. per doz., \$2 per 100

Wilson's Early—Berries large; very early.....\$1 per doz., \$4 per 100 Texas Ex. Early—A wildling from Texas; large berry; prolific bearer; good flavor and firm; will prove very valuable on account of its extreme earliness, ripening, as it does, in advance of Wilson's Early, and equaling that fine variety in size. It has been tested by ourselves and many other growers in this vicinity.....\$1 per doz., \$4 per 100, \$25 per 1,000

Crystal White—A novelty for home gardens; color, yellowish-white. \$1 per dozen.

Taylor's Prolific-Promises to be a fine variety for canners' uses; very
productive\$1 per dozen.
Mammoth Dewberry-The earliest to ripen
Early Harvest-New; said to be the earliest Blackberry; of fair size
and good quality
Early Cluster-This new berry is now offered for the first time, by J.S.
Collins; very early, ripening several days in advance of Early Wilson;
a vigorous, healthy grower; hardy, and extremely productive; berries
medium to large size, and of best quality; sufficiently firm to ship, al-
though sweet, and have no hard, bitter core, like some other varieties.
\$1 each, \$7 50 per 10
and the state of t

RASPBERRIES.

Cuthbert—Berries of the largest size; so very firm that they may be shipped hundreds of miles to market; flavor excellent—best; form conical; color rich crimson; very handsome; strong, vigorous grower. Our plants are genuine and fine. J. T. Lovett says of the Cuthbert: "No other red Raspberry has yet been introduced that has proved of such general adaptability to different soils, exposures, and climates." 75 cts. per doz., \$2 per 100, \$15 per 1,000

I7

The Early Welsh.

Souhegan—A new black cap variety; enormously productive; large, jet black without bloom. The earliest of the black caps. Vine a strong, healthy grower. So far does better than any other cap variety we have tested.......\$1 50 per dozen; \$5 per 100

Yellow Antwerp-Fruit large, pale yellow, sweet and rich.

\$1 per dozen. **Caroline**—A delicious berry, large, pale salmon-color; a strong grower, healthy and hardy. We recommend this variety as the best and most productive yellow raspberry we have ever grown.

\$1 50 per dozen; \$5 per 100

SPECIAL ANNOUNCEMENT.

The Hansell Raspberry—The erliest of all raspberries. Originated by the late Jas. S. Hansell, in Burlington County, New Jersey; has been fully examined by the leading Small Fruit Growers in New Jersey and adjoining States, and owing to its extreme earliness and other good qualities, unanimously pronounced "the most desirable and valuable raspberry in existence." It is believed to be as hardy as that iron-clad variety—the Turner; is a good grower and productive; while the fruit

is of the brightest crimson, of superior quality, good size, and above all, very firm, having been shipped four hundred miles in good condition. This is uniting a vast deal in a single variety certainly, particularly when it is remembered that it ripens, as it does, far in advance of all other kinds. It ripened its first berries in 1880 on June 4th, and on June 11th in 1881. The present season, when everything is nearly two weeks later than usual, it was ripe on June 20th, and afforded a good picking on the 26th—in all instances fully ten days ahead of the *Brandywine* by the side of it, with the same treatment.

The Hansell has fully proven the past season that it is worthy of the high claims made in its favor.

So high an authority as the *Rural New Yorker*, which does not take the word of interested parties, but in their extensive experimental farms test everything for themselves and present the results for the benefit of their many readers, speaks of the Hansell in the highest terms of praise, and pronounce it the *earlist to ripen*.....\$2 50 per dozen; \$16 per 100

Note.—Postage on raspberries, 25 cts. per dozen extra.

STRAWBERRIES.

Great care should be exercised in the selection of varieties. The safest way is to plant but a few plants of a new variety, and test them fully before planting largely, unless you can rely on the person recommending them, and even then success is not sure to follow, for there is no fruit in which soil and location make such a difference as with the Strawberry; and the berry that is a perfect success here, may fail in other soils but a few rods distant.

We will, in our descriptions and opinions of Strawberries, **tell just what we know** of each variety, even though we know that an adverse opinion of some varieties may lose us the sale of thousands of plants.

The system for successful cultivation may be stated in a few words: Manure heavily, cultivate thoroughly, irrigate frequently, keep free from weeds, and keep off the runners. In planting, shorten the roots by cutting off about one half, and spread the roots well out. Shortening them facilitates planting, and also causes them to start to grow quicker.

"Success with Small Fruits," by E. P. Roe, is a beautiful and instructive work—the best on the subject we have ever seen. It is handsomely and profusely illustrated, and should have a place in every library. Strawberry growers, especially new beginners, will find this work of much value.

VARIETIES.

The blossoms of all varieties offered are bi-sexual or perfect, except those

specified as pistillate or imperfect, which are destitute of stamens, as shown by the accompanying cuts.

sexual or Perfect.

Pistillate varieties should have a row of perfect flowered variety planted every fifteen or twenty feet among them. When properly fertilized, some of the pistillate varieties are enormously preductivefor instance, "Crescent Seedling," "Champion," "Green Prolific," etc. Pistillate or Imperfect.

The pistillate varieties do nothing with us, hence we cannot recom-

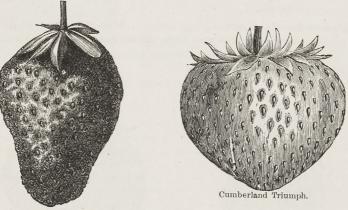

mend them for this locality, although we know that they succeed well in some parts of the State.

LEADING VARIETIES.

Medium to large; uniform bright red, firm, handsome; flavor rather poor; healthy, vigorous grower, and very productive; highly profitable for market; has given satisfaction to growers here during past season; bears well during the Summer months.

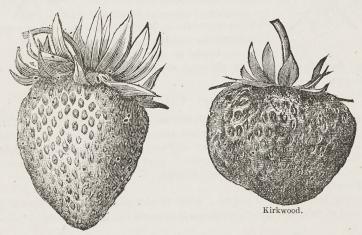

Bidwell..... Very large and productive; color bright, glossy crimson; very firm, and of excellent flavor; promises to succeed in a great variety of soils.

Bidwell.

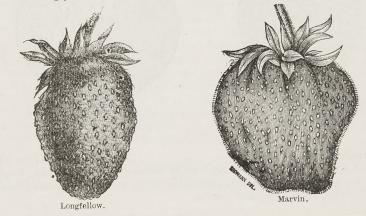

A superb veriety; very large; smooth and uniform; light scarlet; handsome, and of good quality; productive; vine a very strong grower; bears well during the Summer months.

2I

Glendale.

22

The illustration is an accurate representation of a medium sized berry. We believe this will prove a desirable variety in rich, heavy soils.

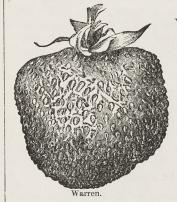

- Monarch of the West. .35 cts. per dozen; \$1 50 per 100; \$5 per 1000 A well known variety; extra large; pale red; excellent quality; plant vigorous; moderately productive; rather soft; has; become one of the leading market berries on this coast.

Miner's Great Prolific.

Miner's Great Prolific-

50 cts. per dozen; \$1 50 per 100; \$7 per 1000 Large to very large; globular, often irregu-[ar; deep crimson; good quality and moderately firm; a strong grower, with clean, healthy foliage, and so enormously productive that the berries are literally heaped about the plants; late.

Warren-

50 cts. per doz.; \$2 per 100; \$10 per 1000 The past Summer it produced plenty of fine, large berries, of very handsome appearance. Plant very vigorous and productive.

VARIETIES NEW OR NOT FULLY TESTED.

James Vick......\$1 50 per doz., \$4 per 100 A remarkably fine new Strawberry; very highly recommended; as a shipping variety, it is particularly desirable. The points of merit of the "James Vick" are briefly:

1. Fine quality, unusual vigor, and hermaphrodite (or perfect) blossoms.

2. Color, form, and firmness of berry, which approach the ideal. No white tips, no coxcombs.

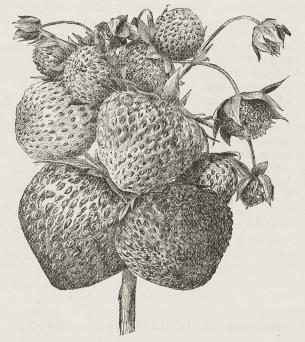

3. Ability to stand on the vines for a week after ripening, without becoming soft, or rotting, or losing quality, or much lustre. Instead of softening, it shrinks a trifle, and becomes firmer than when first ripe.

4. Uniformly large size, and productiveness unequaled by any other

variety. Two hundred and eighty berries were counted on one average plant, and from one row about one hundred feet long, nearly two bushels of berries were gathered.

Charles A. Green writes: "This berry has the constitution to succeed over a large extent of country."

This variety, after another season's fruiting, promises to sustain the high certificate of character given it by its introducer. (For illustration of this variety see outside of last cover page.)

Manchester.

"Form, oblate-conical. Size, large. Color, searlet. Flesh, pink, firm but melting, with a rich sub-acid juice, and a decided aromatic flavor. Leaf-stalk, reddish, as are also the runners. Flower-stalk, stout. Flower, pistillate or imperfect. Plant, robust and very productive. Quality, very good to best. The plant is seemingly well adapted to very light soils, and will doubtless find itself at home throughout a wide range of country, and prove itself to be especially valuable for market, whether near or distant."

Note.—We do not offer this season any of the new varieties being sent out this Fall for the first time, for the reason that we do not believe they will prove superior to varieties we now have. We shall procure and test them, however, and if they prove worthy, will then send them out. At the dozen rates all Strawberry Plants will be sent post-paid; at 100 rates, when forty cents per 100 are sent in addition to the 100 rate, to pay postage.

DECIDUOUS ORNAMENTAL TREES.

Of ornamental stock we offer only a limited list of the very best and hardiest kinds, of which a brief description is given:

"Cork Barked (Suberosa)—Branches very corky. This tree will grow in almost any soil, wet or dry.....50 to 75

27

Horse Chestnut (Æsculus) European)
" Red Flowering-A splendid tree, with showy red	
flowers 1 00)
Locust, Yellow-Well known	5
" Honey (Gleditschia' Triacanthos)-The well known honey	
locust)
Kentucky Coffee Tree (Gymnocladus Canadensis)-A fine tree,	
with long, feathery foliage)
Maple, Silver Leaved (Dasycarpum)-One of the finest trees	
for park or street planting; is a rapid grower; leaves white"	
or silvery underneath	ă
" Wier's Cut-leaved-A weeping, graceful silver maple,	
with leaves deeply cut 1 00	0
" Sugar (Sacharinum)—A stately tree of fine form and foli-	
age	5
Mountain Ash (European)—A fine, hardy tree, covered from July	
to Winter with clusters of red berries	5
" Oak-leaved 1 00	0
Mulberry, American—A fine, rapid growing tree, with large	
foliage	0
" Multicaulis	
" White (Alba)—This and the Multicaulis are used for silk	Ő
culture, and will grow in any soil if once established25 to 50	0
Peach, Double Crimson	
" Double White —Flowers pure white, double35 to 5	
Poplar, Carolina—Very large leaves and a rapid grower25 to 5	
" Lombardy or Italian—An erect and rapid grower,	Č
much used for street planting and road-sides	h
Texas Umbrella Tree (Melia Azedarach Umbraculiformis)—A	
variety of the Pride of China Tree, but more hardy. It	
assumes a dense spreading head, resembling a gigantic	
umbrella, and of unique appearance. The most popular	
shade and avenue tree in the Southern States	0
Thorn, Double Red—Bright red double flowers	
" White—White flowers	
	~

WEEPING TREES.

Birch, Cut-leaved-An elegant tree with "slender, drooping	
branches	00
Elm, Camperdown-The most graceful weeper of all the elms;	
foliage large; very ornamental 2	00
Mountain Ash1	50

Poplar (Grandidentata Pendula)-A new variety, with long slender		
branches drooping gracefully to the ground; one of the finest of		
weeping trees	1	00
Thorn-A slender-branch variety, with a very drooping habit, cov-		
ered with white flowers in the Spring	1	50
Willow, Common	1	00
Willow, Kilmarnock	1	50

EVERGREEN TREES.

Acacia Dealbata—One of the best of its class; fine feathery foli-
age; flowers in Winter. Each\$0 50
" Latifolia-A strong-growing tree, with fine foliage and
yellow flowers; early in Spring
Arbor Vitæ, American (Thuja Occidentalis)-White Cedar of
the Eastern States; very hardy50 to 1 00
" Ever Golden (Semper Aurea)—A new variety of the Gol-
den Arbor Vitæ of dwarf habit, but of a free growth. It
retains its golden tint the year round. One of the best
golden variegated evergreens
" Golden (Biota Aurea)—One of the most beautiful of ever-
green trees; foliage yellow in Spring\$1 to 2 00
Blue Gum (Eucalyptus Globulus)-The well known Australian
tree
Cypress Elegans-A new, fast-growing variety, with bluish foli-
age
" Funeral (Funebris) - Beautiful drooping fooliage; well
adapted for planting in cemeteries
" Gracilis-Foliage of a beautiful glauceous green, and reg-
ular outline of growth; promises to make a handsome tree 1 00
" Lawson's-A very graceful tree, with a bluish green foli-
age
" Monterey-This tree is well known, and more planted
than any other evergreen tree in California25 to 75
" Italian-This tree grows column-like, very erect, which
gives it a striking appearance; much used for arches over
gates and entrances
Eucalyptus Sideroxylon-Iron-barked Gum 56
Juniper (Irish)—A compact, tapering, pretty little tree
Magnolia Grandiflora - The most majestic of all American
trees; a native of the Southern States; perfectly hardy here.
